MRH	Multi Risque Habitation
ORSA	Own Risk and Solvency Assessment
SCR	Solvency Capital Requirement
SST	Swiss Solvency Test

Glossary

Ancillary Own Funds

Ancillary Own Funds shall consist of items other than Basic Own Funds which can be called up to absorb losses. They require supervisory approval and cannot be used to cover the MCR. (Solvency II Directive 2009/138/EC, Article 89)

Basic Own Funds

Basic Own Funds are composed of the excess of assets over liabilities, valued according to market-consistent principles, and subordinated liabilities.

Best Estimate

The Best Estimate is part of the Technical Provisions. It corresponds to the probability-weighted average of future cash-flows, taking account of the time value of money (expected present value of future cash-flows), using the relevant Risk-free Interest Rate Term Structure. The calculation of the Best Estimate is based upon up-to-date and credible information and realistic assumptions and is performed using adequate, applicable and relevant actuarial and statistical methods. The cash-flow projection used in the calculation of the Best Estimate takes account of all the cash in- and out-flows required to settle the insurance and reinsurance obligations over the lifetime thereof. It is calculated gross of reinsurance.

Minimum Capital Requirement

The Minimum Capital Requirement corresponds to an amount of eligible Basic Own Funds. Below this amount policy holders and beneficiaries are exposed to an unacceptable level of risk so that insurance and reinsurance undertakings are not allowed to continue their operations.

(Solvency II Directive 2009/138/EC, Article 129)

Own Risk and Solvency Assessment (ORSA)

Own Risk and Solvency Assessment is a risk management process which connects business strategy and capital planning and is an integral part of the business strategy. ORSA needs to be performed annually or whenever the risk profile changes significantly. The process is owned by the Board, and must be documented and reported internally and to the supervisor.

Own Funds

Own Funds are defined as the sum of Basic Own Funds and Ancillary Own Funds.

(Solvency II Directive 2009/138/EC, Article 77)

Reconciliation Reserve

The Reconciliation Reserve (revaluation reserve) is part of the Own Funds of the Solvency II balance sheet. It results from the surplus of assets over liabilities less items such as share capital, capital reserve or foundation funds, preference shares and Surplus Funds. In addition, adjustments must be made, such as for foreseeable dividend payments.

Risk Margin

The Risk Margin is part of the Technical Provisions and shall be such as to ensure that the value of the Technical Provisions is equivalent to the amount that insurance and reinsurance undertakings would be expected to require in order to take over and meet the insurance and reinsurance obligations. The Risk Margin is determined by the cost of providing an amount of eligible own funds equal to the Solvency Capital Requirement necessary to support the insurance and reinsurance obligations over the lifetime thereof.

(Solvency II Directive 2009/138/EC, Article 77)

Risk-free Interest Rate

The Risk-free Interest Rate term structure is relevant for the calculation of liabilities by insurance and reinsurance undertakings. EIOPA is required to publish the Risk-free Interest Rate for Solvency II.

As a default approach, the Risk-free Interest Rate is primarily derived from the rates at which two parties are prepared to swap fixed and floating interest rate obligations. (EIOPA-BoS-15/035)

Solvency Capital Requirement (SCR)

The Solvency Capital Requirement should reflect a level of eligible Own Funds that enables insurance and reinsurance undertakings to absorb significant losses and that gives reasonable assurance to policy holders and beneficiaries that payments will be made as they fall due. This amount is determined with reference to the risks assumed by the Company.

(Solvency II Directive 2009/138/EC, Paragraph 62)

Solvency II Ratio

The Solvency II Ratio represents the Company's Own Funds against its SCR. Insurance and reinsurance undertakings are required to maintain their Solvency II Ratio above 100%. If the ratios are lower, measures are initiated by the national supervisory authority, such as the need for an action plan to restore the ratios to required levels.

Surplus Funds

Surplus Funds shall be deemed to be accumulated profits which have not been made available for distribution to policy holders and beneficiaries.

In so far as authorised under national law, Surplus Funds shall not be considered as insurance and reinsurance liabilities to the extent that they fulfil the criteria set out in Article 94(1).

(Solvency II Directive 2009/138/EC, Article 91)

Technical Provisions

The value of the Technical Provisions under Solvency II corresponds to the amount which another insurance or reinsurance undertaking would be expected to require to take over and fulfil the underlying insurance and reinsurance obligations. They are calculated as the sum of the Best Estimate liabilities and the Risk Margin.

Volatility Adjustment

The Volatility Adjustment is a measure to ensure the appropriate treatment of insurance products with long-term guarantees under Solvency II. (Re) insurers are allowed to adjust the risk-free-rate to mitigate the effect of short-term volatility of bond spreads on their solvency position. In that way, the Volatility Adjustment prevents pro-cyclical investment behaviour of (re)insurers.

Executive Summary

FRIDAY Insurance S.A. (the "Company" or "FRIDAY") is a non-life insurance company. It operates under the legal form of a stock corporation (Société anonyme). FRIDAY is part of the Baloise Group (owned by Baloise Holding Ltd, Switzerland). Located at the heart of Europe, with its head office in Basel, the Baloise Group is a provider of prevention, pension, assistance and insurance solutions.

The purpose of this report is to satisfy the public disclosure requirements under the Luxembourg "Loi du 7 Décembre 2015 sur le secteur des Assurances" (Luxembourg Law on the Insurance Sector) including the Solvency II Directive 2009/138/EC, the Commission Delegated Regulation (EU) 2015/35 and the EIOPA Guidelines on Reporting and Disclosure. The elements of the disclosure relate to business and performance, system of governance, risk profile, solvency valuation and capital management.

The European Solvency II Directive serves to improve and harmonize EU insurance regulation to unify the European insurance market and strengthen consumer protection. This risk-based system is covering both quantitative and qualitative aspects to define the capital requirements of each company subject to the regulation. Solvency II is divided into three pillars representing financial requirements, governance and supervisory requirements and finally reporting and disclosure requirements.

Highlights

FRIDAY is an insurance company incorporated in 2017 offering motor insurance policies, home content insurance policies and private liability insurance policies in the German market and Multi Risque Habitation (MRH) policies in the French market. As a digital insurer the Company focuses primarily on the development of a simple, digital and sustainable insurance experience for customers. FRIDAY's goal is to become the most popular digital insurer by offering an insurance experience customers love.

FRIDAY has successfully developed its operations and business in the last years. The partnership with Seven Ventures GmbH enables FRIDAY to advertise its insurance products in the advertising outlets of the ProSiebenSat.1 Group, which have a wide reach in Germany among FRIDAY's relevant target groups.

The continuation of the advertisement campaign increased brand awareness in Germany and built trust with customers. The focus was put on the brand promise to create an insurance experience that customers love. The FRIDAY brand achieves top values for modernity, simplicity and innovation and stands for relief and flexibility among customers in Germany. The brand is in line with the characteristics of the products. Every fourth person in Germany knew the FRIDAY brand in December 2022 as the market research and data analysis company YouGov showed. This is an outstanding result among new insurance market participants in Germany. FRIDAY's business model is based on building digital solutions for the insurance industry. In 2021 FRIDAY has incorporated a French branch in Paris and in the same year the Company successfully launched its offering in France as second market besides Germany. In France FRIDAY currently offers a MRH

insurance which is a multi-risk home contents, building and private-liability insurance product. The launch in France was an important proof point for FRIDAY in the creation of a multi-country insurance platform. Also, with the launch of France, FRIDAY Insurance S.A. continues its transformation from a pure-play car insurance firm to a digital provider of property and casualty insurance, started in 2019 with the introduction of home contents insurance and legal insurance for motorists followed by the private liability product and accident insurance, offered to customers via intermediation, in 2022 in Germany.

The main focus of FRIDAY in innovation is on automation of insurance relevant processes as well as their optimization from the customer's point of view. FRIDAY directs its attention on developing solutions for mass market business that are highly scalable. This is particularly reflected in the technical infrastructure. The Company provides all its insurance services entirely paperless and fully digital.

On this basis, different innovations were introduced to the German insurance market in the first operating years since 2017. These developments took place in a competitive and dynamic environment.

FRIDAY has a sound capital base. The Company's capital strength in accordance with Solvency II was reported at a level of 381% at the end of 2022.

FRIDAY intends to continue to develop, market and invest in innovative insurance solutions. By increasing awareness of the already well received FRIDAY brand and optimizing its distribution channels. A further diversification of distribution channels in Germany by introducing the broker business took place in the recurrent reporting year. FRIDAY plans to further develop its customer base and continue its growth path.

FRIDAY actively support environmental protection and focuses on sustainable and responsible actions. We integrate sustainability into many areas of our business activities and processes. We deal responsibly with employees, customers, partners, investors, the environment, and society. Already in 2018, we offered our customers an ECO tariff by which they could offset their car's CO2 emissions. In 2020, FRIDAY itself became fully CO2 neutral. This remains an integral part of our strategy and, therefore, we as an insurance company will strive to fulfil this responsibility also in the future.

Since October 2018, FRIDAY customers have been able to contribute to climate protection by offsetting their CO2 emissions generated by driving. FRIDAY's German branch was able to offset 4,032 tons of CO2 and other harmful greenhouse gases such as methane and nitrous oxide between April 2021 and March 2022 thanks to the "FRIDAY+ECO" product.

This is an increase of around 1,800 tons or more than 80 percent compared to prior year. The selected climate protection projects for compensation meet the highest standards.

COVID-19 Implications

After the two years 2020 and 2021, which were strongly influenced by the corona pandemic, the corona situation worldwide eased in 2022. Advanced vaccination campaigns and the progressive primary vaccination of the population have led to an improvement of the situation. As a result,

FRIDAY was able to scale back all corona measures taken in the course of the year. Lasting from the corona measures is the progress in the digitization of business processes and hybrid working, which increasingly allows employees to work from both, the office and at home.

FRIDAY's crisis management was appropriate to the situation at all times. The business model is stable, and with marginal adaptations to the changed business environment, the corona pandemic was successfully mastered. FRIDAY has shown that it has been able to successfully continue on its path of sustainable and continuous growth and at the same time being a reliable partner for its clients, investors, employees and society.

War in Ukraine

Russia's attack on Ukraine is a severe incident in Europe. A wave of helpfulness stroked Europe, and also the employees of FRIDAY. The consequences of the war have a huge impact on the people of Ukraine and, indirectly, on many other European countries. Refugee flows, rising prices and expensive gas affect the entire society in Europe.

FRIDAY's insurance business is not directly affected by the war. The indirect consequences to the market environment were closely monitored by FRIDAY.

Macroeconomic situation and inflation

Worldwide, the corona pandemic led to an impairment of supply chains, which was further exacerbated by Russia's invasion of Ukraine. This can be seen in the tense energy situation in Europe. In combination with the various monetary and economic policy measures taken in previous years to contain the corona pandemic, inflation has skyrocketed, and economic forecasts deteriorate. In response to this, interest rates were raised several times in 2022 and the «quantitative easing programs» that have been rolled out extensively were gradually reduced. As a result, both equities and fixed-interest securities suffered a sharp fall in prices in 2022.

FRIDAY continues to manage its own investment portfolio with foresight in this challenging market environment.

Business and Performance

FRIDAY's business continuous still growing in a challenging market

In 2022 FRIDAY attracted 88 thousand new customers in Germany and France with its straightforward digital processes and products. One in three contracts was concluded via FRIDAY's direct channel. FRIDAY's products were awarded several times in Germany by renowned consumer organizations as Stiftung Warentest and leading media outlets for their best value for money proposition. The awards demonstrate the high quality of FRIDAY's insurance products. The Company received top values for modernity, innovation, flexibility and fairness. Also, FRIDAY has been recognized as a Top20 start-up in Germany by Jung von Matt, a leading advertising agency.

The total amount of gross written premiums in the 2022 financial year was EUR 51,608.1 thousand (2021: EUR 48,745.4 thousand). In comparison with the previous period, the volume of premiums was raised by around 6%. These gross premiums were earned in an economically competitive environment on the German and French insurance market.

System of Governance

FRIDAY practices a sound, responsible corporate governance

FRIDAY places high importance on practicing a sound, responsible corporate governance.

The system of governance in place at FRIDAY is considered as adequate to the nature, scale and complexity of the risks inherent in the Company's business. Adequacy is confirmed through the governance principles in line with regulatory requirements. Furthermore, the fit and proper process applied, together with the Company's code of conduct ensures the adequacy of key personnel such as the adequacy of key functions implemented according to Solvency II regulation.

Risk Profile

All material risks are identified, assessed and managed

All risks as defined under a proven Risk Map and the Solvency II regulatory framework are assessed on a regular basis by taking into account risk mitigating measures. Management of the different risks is organized at two levels. In a first step risks are assessed in a bottom-up process by the functional department responsible (risk owner and risk controller). In a second step, the assessments are aggregated at company level.

FRIDAY regularly assesses whether the resulting risk profile is compliant with its risk strategy.

The key drivers of the Solvency Capital Requirement are the non-life underwriting risk and the market risk. The non-life underwriting risk is driven by the premium and reserve risk directly related to the volume of premiums and reserves. The largest share of the non-life underwriting risk stems from the premium risk. The market risk is largely determined by investments in fixed income assets.

During the reporting period the non-life underwriting risk slightly decreased compared to last year. The slight variation is mainly driven by the decrease of the reserving thanks to continuous improvement of our past claims experience and also a better diversification of the risk due to the development of the activity in France and a slight increase of the home content and private liability proportion in the portfolio mix. The market risk decreased in line with the sale of bond investments due to the capital consumption for operational business impacting both the interest rate risk as well as the spread risk.

Valuation for Solvency purposes

Material differences between Solvency II and Local GAAP have been analyzed and explained

Valuation principles and results are presented under both the Solvency II and local accounting guidelines (Local GAAP). Significant differences between these frameworks are documented. This not only comprises differences in valuation principles, but also differences in recognition and/or in classification of certain assets and liabilities.

Material changes linked to valuation for Solvency purposes during the year relate to a) financial assets valuation where bonds are valued at the lower of cost or market value method in the statutory accounts whereas they are valued at the market value according to Solvency II requirements and b) intangible assets where formation expenses and license costs are valued at amortized costs method in statutory accounts whereas they are ignored by valuation of zero according to Solvency II requirements. On the liabilities side, the main changes are reflected in the Technical Provisions, for which Solvency requirements highlight the need to base our calculation upon up-to-date and credible information, as well as realistic assumptions. This method is reflected in the Best Estimate of the technical provision under Solvency II.

Capital Management

Solvency II ratio confirms solid capitalization

The Company's Solvency II ratio was reported at a level of 381% at the end of 2022. The Volatility Adjustment is not used to calculate the Technical Provisions and does not impact the Company's Solvency II ratio. Transitional arrangements are not applied. The legal requirement to hold sufficient own funds to cover the Solvency Capital Requirement has therefore been fulfilled. The own funds of FRIDAY entirely consist of unrestricted Tier 1 funds.

Own Funds: Eligible Own Funds and capital requirements

	2021		2022				
		Total	Total	Tier 1 - unrestricted	Tier 1 - restricted	Tier 2	Tier 3
in EUR '000							
Available and eligible Own Funds							
Total available Own Funds to meet the SCR	R0500	33,482.3	26,197.1	26,197.1	-	-	-
Total available Own Funds to meet the MCR	R0510	33,482.3	26,197.1	26,197.1	-	-	-
Total eligible Own Funds to meet the SCR	R0540	33,482.3	26,197.1	26,197.1	-	-	-
Total eligible Own Funds to meet the MCR	R0550	33,482.3	26,197.1	26,197.1	-	-	-
SCR	R0580	7,645.8	6,876.6				
MCR	R0600	3,700.0	4,000.0				
Ratio of Eligible Own Funds to SCR	R0620	438%	381%				
Ratio of Eligible Own Funds to MCR	R0640	905%	655%				

The available own funds decreased by EUR 7,285.2 thousand during the reporting period mainly driven by unrealized losses and by the result of the year. The Company's Solvency II ratio decreased from 438% to 381% during the reporting period.

Post closing events

During the preparation of this report Gert de Winter (member of the board of directors) announced his resignation due to private reasons. With effect of 4th April 2023 he is no longer member of the Board of Directors.

A. Business and Performance

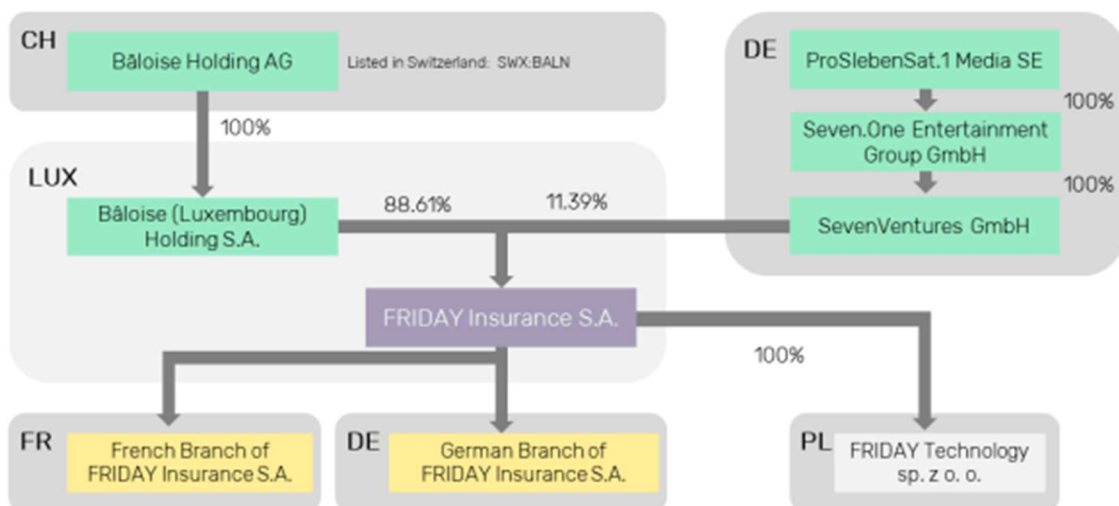

A.1. Business

A.1.1. General Information

FRIDAY is an insurance company incorporated in the Grand Duchy of Luxembourg on 1 December 2017 as a stock corporation (Société anonyme) and published in the Memorial, special publication for companies and associations, under number B220195. The Company is supervised by the Commissariat aux Assurances the Luxembourgish supervisory authority situated at 11, rue Robert Stumper, L-2557 Luxembourg.

The external auditor of FRIDAY is Ernst & Young S.A., whose registered office is at L-1855 Luxembourg, 35E, avenue John F. Kennedy.

Bâloise (Luxembourg) Holding S.A., a 100% subsidiary of the ultimate parent company Bâloise Holding Ltd, is the main shareholder of the Company holding 88.61% of shares. The other shareholder SevenVentures GmbH holding 11.39% of shares. The following simplified chart shows further details of FRIDAY's position within the legal structure of the Baloise Group as of the reporting date of 31 December 2022.

On 16th May 2018, the German branch "Deutsche Niederlassung der FRIDAY Insurance S.A." was established as FRIDAY's branch in Berlin, Germany, and started its operative business as of 1st July 2018.

In November 2019, FRIDAY incorporated FRIDAY Technology Sp. z o.o. in Warsaw, Poland, a wholly owned subsidiary.

On 10th February 2021, the French branch "FRIDAY Insurance S.A. succursale française" was established as FRIDAY's branch in Paris, France, and started its operative business as of 1st July 2021.

FRIDAY is included in the consolidated accounts of the Bâloise Holding Ltd headquartered in Basel, Switzerland, whose registered office is at CH-4001 Basel, Aeschengraben 21 (Switzerland).

A.1.2. Significant business and geographical coverage

Main business lines and geographical areas

The Company is currently active on the German and French market.

The premiums written of the non-life insurance business are broken down as follows among the business lines below:

Non-Life Net Written Premiums

	2022	%
EUR '000		
Income protection insurance	32,7	0,3%
Motor vehicle liability insurance	5.367,9	48,8%
Other motor insurance	4.015,9	36,5%
Fire and other damage to property insurance	1.212,0	11,0%
General liability insurance	310,1	2,8%
Assistance	66,0	0,6%
Legal Insurance	1,1	0,0%
Miscellaneous financial loss	0,2	0,0%
Total	11.005,9	100,0%

The largest contribution to the premium volume (85,3% in YE22 compared to 92,4% in YE21) comes from the "motor vehicle liability insurance" insurance (48,8%) and "Other motor insurance" (36,5%) driven by the volume of car business activity in Germany. The share of "Fire and other damage to property insurance" increased (11% compared to 6,8% in YE21) due to growing German home-contents business and the growing MRH business in the French market. The share of general liability insurance is growing in 2022 with the development of the existing MRH portfolio in France and the introduction of the private liability insurance in April 2022 in the German market.

Assistance relates to an additional coverage for road assistance benefits sold in combination with motor vehicle liability insurance.

All products in Germany and France are now sold via several price comparison platforms as well as via direct sales. In Germany the products are also distributed via brokers.

Significant business or other events

FRIDAY has extended its offer in Germany by launching the private liability product in April 2022.

A.2. Performance of Underwriting Activities

In this section, information on the Company's underwriting performance over the reporting period in terms of premiums, claims and expenses is provided. The investment income is not considered as it is presented in a separate section.

A.2.1. Underwriting performance against prior reporting period

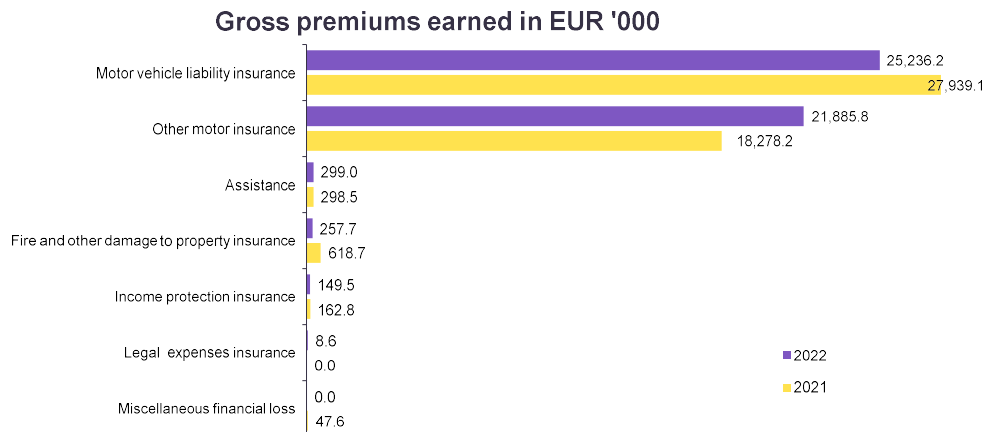

The Company's principal results can be broken down in the following manner:

Principal results	2021	2022
in EUR '000		
Gross written premiums	48,745.4	51,608.1
Gross earned premiums	47,314.0	47,519.9
Gross claims expenses	-48,701.5	-47,126.9
Gross operating expenses	-21,188.7	-23,764.0
Reinsurance balance	4,168.1	-886.6
Technical result non-life	-17,527.2	-22,437.7

Increased gross written premiums are mainly driven by growth in new business due to extended brand building measures and marketing activities in the lines of business of motor vehicle liability and other motor insurance, private liability insurance and home-content insurance in Germany and the MRH product in France. Gross claims expenses have been decreased against the trend of raising claims frequencies with increase of mobility after end of covid 19 restrictions and increase of average claims amounts due to inflation. The claims frequency increased in the beginning of 2022, significantly influenced by weather events in the beginning of the year and increased general mobility. This could not be compensated completely, but until the end of the year a normalization took place. The reinsurance balance amounts to EUR -866.6 thousand. FRIDAY delivered an overall business loss of EUR31,983.7 thousand including its branches with the technical result being included by EUR -22,437.7 thousand. The overall business loss mainly stems from implementation and build-up costs such as development of FRIDAY's insurance platform,

building the FRIDAY brand, the French market entry and customer acquisition to build our insurance portfolio.

The development of the gross premiums during the reporting period is presented in the following illustration.

In 2022, FRIDAY Insurance S.A. continued in growing despite the competitive environment and introduced a private liability insurance in Germany. These gross premiums were earned in a very competitive environment on the German and French online insurance market. However, FRIDAY observed a shift towards digital user behavior of a wide range of products and expects therefore an increase in the demand for digital insurance solutions in direct sales and via online price comparison platforms in the future.

A.3. Performance from Investment Activities

A.3.1. Review of current and prior period investment income and expenses

Overview of the investment performance as per financial statements

The table below shows an overview of the investment performance as per the financial statements of the current period.

Investment performance

	2021	2022			Total
	Total	Bonds	Loans and mortgages	Cash and cash equivalents	
in EUR '000					
Recurring income	227.3	198.6	6.2	1.5	206.2
Realized gains	431.4	27.4			27.4
Realized losses	-78.1	-44.0			-44.0
Appreciation in value	0				0
Depreciation in value	0				0
Cost of investment management	-121.0	-86.4			-86.4
Operational profit	459.5	95.6	6.2	1.5	103.3
Average investment portfolio	64,692.2	44,407.5	238.3	5,608.9	50,254.7
Investment performance ¹⁾	0.7%	0.2%	2.6%	0.0%	0.2%

¹⁾Calculation of investment performance: Operational profit / average investment portfolio

The investment portfolio mainly contains bonds. The increase of the interest rates due to the monetary policies of the Central Banks has impacted the market value of our bonds. During the reporting period, the Company realized losses for an amount of EUR 44.0 thousand from sales of bonds. The small exposure in loans and mortgages refers to a granted loan to FRIDAY Technology Sp. z o.o.

Current income (compared to previous period)

The split of the current income by asset class is presented in the previous paragraph.

The decrease of the income compared to 2021 is mainly driven by the decrease of the stock of our assets from an average of 64,692 thousand in 2021 to EUR 50,255 thousand 2022.

Gains and losses recognized directly in equity

The following table shows the gains or losses recognized directly in equity.

Gains and losses recognized directly in equity

	2021	2022	Variation
in EUR '000			
Unrealized gains and losses from bonds available for sale	529.3	-5,060.8	-1,056.1%
Total	529.3	-5,060.8	-1,056.1%

The decrease of unrealized gains from bonds are mainly linked to the development of the interest rates in 2022 with a strong increase compared to YE 2021.

Investments in financial instruments based on securitization

At year-end 2022 the Company has no investments in financial instruments based on securitization.

A.4. Performance of Other Activities

A.4.1. Review of current period and prior period other income and expenses

For year-end 2022 the other technical income and expenses amounting to EUR 381 thousand and to EUR 376 thousand respectively can be split as follows:

Other technical income:

- **Other gross technical revenues** consist mainly of rejection and dunning fees as well as reimbursements of charges incurred for FRIDAY Technology Sp. z o.o.

The variation of the Other technical income compared to the last reporting period is mainly explained by increase of reimbursements of charges incurred for FRIDAY Technology Sp. z o.o by EUR 77 thousand.

Other gross technical expenses:

- **Other gross technical expenses** consist mainly of value adjustments on customer balances and realized losses on tangible and intangible assets.

Other gross technical expenses were driven by growth of business volume and value adjustments on customer balances, and receivables from reinsurers, and losses from customer accounts and subrogation and salvages for an amount of EUR 174 thousand.

A.5. Other relevant Information

No supplementary information or risks in addition to the information previously disclosed is considered material.

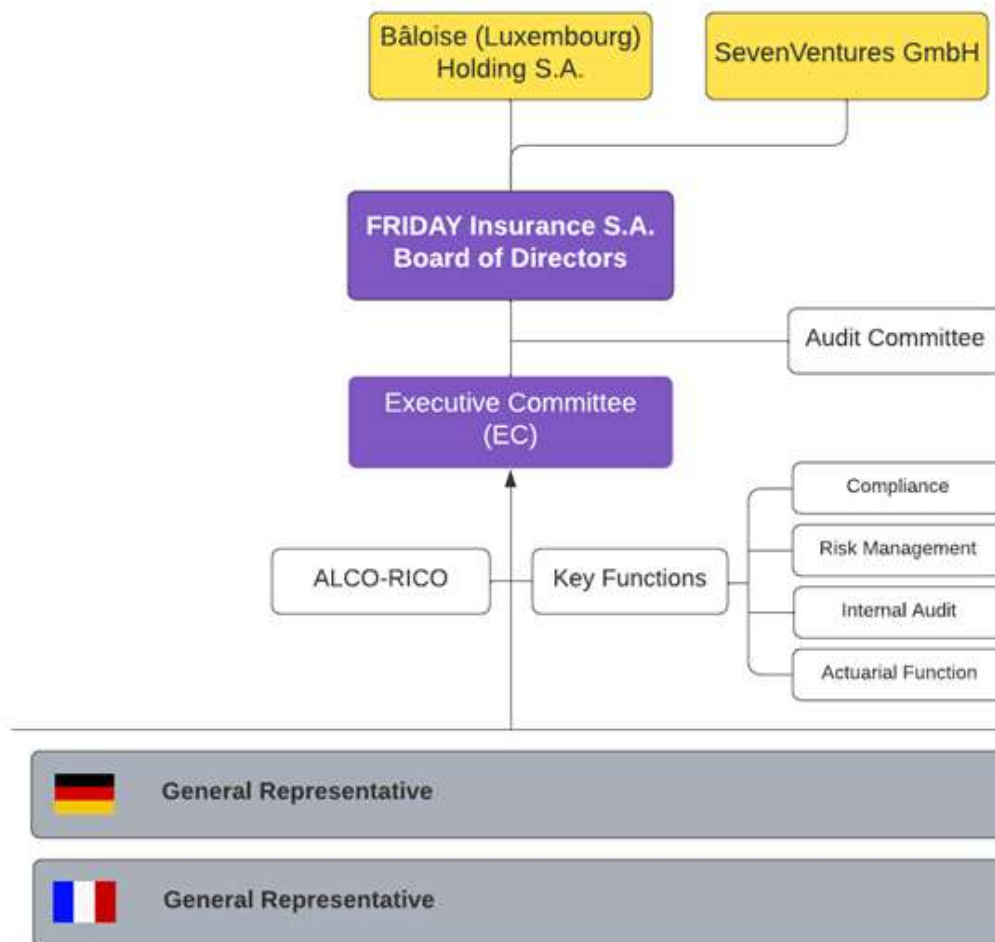

B. System of Governance

B.1. General information on the system of governance

B.1.1. Governance structure: overview and main changes

Good management is of great importance to FRIDAY and the appropriateness of the system of governance is continuously monitored by the Company.

The Company's governance structure is illustrated in the chart below.

FRIDAY's governance structure consists of a clear division of responsibilities between the Board of Directors and the Executive Committee. As key functions, the Risk Management Function, Actuarial Function, Compliance Function and Internal Audit Function carry out the oversight responsibilities.

- The Board of Directors is vested with the broadest powers to act in the name of the Company. It delegates the daily management of the Company as well as the representation of the Company in relation to such daily management to the Dirigeant Agréé. It creates specialised committees such as an Audit Committee, and other committees such as the Executive Committee and determines amongst others its/their composition and powers, as well as the terms of the appointment, removal, and duration of the mandate of their members.
- The main role and responsibility of the Executive Committee is to discuss and determine FRIDAY's insurance activities. The Executive Committee proposes the general strategy of the Company to the Board of Directors and ensures the effective application and implementation of the strategy throughout the Company.
- The Dirigeant Agréé is the chairman of the Executive Committee. He is vested with an overall responsibility on the Company due to its function. He is the representative of the Company before the Commissariat Aux Assurances.
- Amongst the members of the Executive Committee, a CEO is designated by the Board of Directors. The CEO is in regular contact with the Board of Directors and ensures that communication of all relevant information is done in due time. He is also the main contact of the Company's shareholders.
- The General Representative of the respective branch is the local country head. He is in charge of the daily management of the activities performed by the respective branch and represents the branch towards third parties and the local regulatory authorities.
- All key functions (Risk Management Function, Actuarial Function, Compliance Function and Internal Audit Function) shall report to the Dirigeant Agréé assuring independence from the operational business. The independence is further guaranteed through direct access to the Audit Committee and the Board of Directors.

Board of Directors

Composition of the Board of Directors

FRIDAY's Board of Directors is composed of at least three members who are appointed by the general meeting of shareholders. The members are non-executive directors and, in one case, an executive director (Dirigeant Agréé). Members of the Board of Directors are appointed for the duration of one year.

All Board members must have equivalent access to information and resources to perform their duties. The group of non-executive directors should have collective knowledge of all important Company activities. The non-executive directors are individually sufficiently qualified and have as a group the necessary knowledge to perform their supervisory tasks.

Board members regularly update their skills and improve their knowledge of the Company. They have an excellent understanding of FRIDAY's activities and of the group's structure.

Functioning of the Board of Directors

The Board of Directors meets regularly and as often as necessary to ensure effective accomplishment of its obligations (at least three times a year). The majority of the meetings of the Board of Directors must be held in Luxembourg, at the premises of the head-office.

The Board of Directors elects a Chairman from among its members and meets upon call by the chairman. The Board of Directors can only act validly if at least a majority of the Directors are present or represented at a meeting. Decisions are adopted by a majority vote of the Directors present or represented at a Board of Directors meeting. In the case of a tie, the chairman has a casting vote.

The considerations are reflected in the meeting minutes to be signed by the Chairman of the Board of Directors.

The Board also appoints a secretary, who does not have to be a Board member. The secretary ensures the implementation of the rules and procedures governing the operation of the Board, under the authority of the Chairman. The secretary drafts the meeting minutes, noting any decisions taken by the Board.

The Chairman of the Board shall ensure, with the assistance of the secretary and the Company's executive management, that the Directors receive timely and adequate information enabling them to perform their duties in an informed manner.

In order to support the Board of Directors, specialized dedicated committees were created. Their functioning and reporting are outlined below.

Main roles and responsibilities of the Board of Directors

The Board of Directors is responsible for the Company's management. It is vested with the broadest powers to act in the name of the Company and delegates the daily management of the Company as well as the representation of the Company in relation to such daily management to the Dirigeant Agréé. The Board of Directors may create specialized committees such as a Risk, Audit and Executive Committee and determines amongst others its/their composition and powers, as well as the terms of the appointment, removal, and duration of the mandate of their members. The Board of Directors is responsible for the supervision of the committee's activities. It validates the Company's general strategy as proposed by the Executive Committee.

As a collective body, the Board acts in the corporate interest of FRIDAY and serves all the shareholders by ensuring the long-term success of the Company. As an individual, each member of the Board is committed by a duty of loyalty towards FRIDAY and its shareholders. Each member exercises his mandate with integrity and commitment, and independently of any conflict of interest.

In case a board member would be in a conflict of interest situation that could not be avoided, he would inform the Board of such conflict and will refrain from deliberating or voting on the issue concerned (except for everyday transactions entered into normal conditions). Any abstention due

to a conflict of interest would be indicated in the minutes of the Board meeting and disclosed at the next General Meeting of Shareholders (according to legal provisions).

The Board of Directors appoints the key functions (Risk Management, Actuarial, Compliance, Internal Audit) of the Company, taking into account the fit and proper principles.

The Board of Directors can set up, when appropriate, specialized committees. The introduction of these committees may not influence the responsibilities of the Board.

The Company's Board of Directors has established an Audit Committee and an Executive Committee.

Audit Committee

Composition of the Audit Committee

The Board of Directors appoints the members and the Chairman of the Audit Committee. The Chairman of the Audit Committee is not the Chairman of the Board of Directors.

The Audit Committee is collectively expert in the area of finance, financial management and financial reporting, accounting and controlling. The members of the Audit Committee must have experience in the field of insurance and/or finance and accounting.

In exercising their assignment, the members have the required objectivity and independence in respect of the Executive Committee.

Members of the Audit Committee are non-executive Directors.

According to Luxembourg Law dated 23 July 2016 on audit profession, when all the members of the Audit Committee are also members of the Board of Directors, independence status of a majority of Audit Committee members towards the Company is not required.

Functioning of the Audit Committee

The Audit Committee can only make valid recommendations if at least half of the members are present in person. Decisions are taken with an absolute majority of votes. In case of a tie, the director chairing the meeting has a casting vote.

The Audit Committee can decide to be assisted by expert parties and can invite third parties for discussion of specific agenda items.

The Audit Committee meets at least two times a year.

Roles and responsibilities of the Audit Committee

The Audit Committee has the following responsibilities (Luxembourg Law 23 July 2016 on audit profession, Article 52 §6):

- Communication of the audit results on annual accounts to the Board of Directors.

- Monitoring of the annual accounts elaboration process.
- Checking of the efficiency of internal controls related to the annual accounts.
- Monitoring of the implementation of any finding expressed by the regulator.
- Checking of the external auditor independence (i.e. supply of non-audit services).
- Responsibility of the external auditor selection process (rotation rule).

In addition, as part of the good governance practices of overseeing the organization and operation of internal and external control systems, the Audit Committee is also responsible for:

- checking that the Company has effective internal control systems, risk management and independent control functions.
- monitoring the activities of the internal audit: approval of the audit plan, resources used, activity reports, audit reports were issued and measures put in place to remedy any deficiencies discovered by the internal auditors.

Executive Committee

Role of the Executive Committee

The main role and responsibility of the Executive Committee shall be to discuss and determine FRIDAY's insurance activities, within the limits of the powers delegated by the Board of Directors and in accordance with the Luxembourg law of 10 August 1915 on commercial companies. The Executive Committee shall propose, but not approve, the general strategy of the Company to the Board of Directors and ensures the effective application and implementation of the strategy throughout FRIDAY, including all branches of the Company. The approval of the general strategy is exclusively reserved by the Luxembourg law of 10 August 1915 on commercial companies to the Board of Directors.

Composition of the Executive Committee

The Executive Committee shall be composed of at least two members and shall form a collegial body.

Each member of the Executive Committee has the necessary competences, knowledge and experience in all important activities of the Company, especially in respect of the topics under their direct responsibilities.

Each member of the Executive Committee shall meet the fit and proper requirements as defined by the Luxembourg insurance law dated 07th December 2015 and must be notified to the Commissariat Aux Assurances.

The Executive Committee is composed of the Dirigeant Agréé (Authorized Manager) and FRIDAY's Managing Directors, including the CEO.

The Executive Committee is supervised by the Board of Directors.

Specific tasks and responsibilities are delegated by the Board of Directors to the Executive Committee in accordance with the articles of association and the rules of procedure of the Executive Committee.

Within the limits of Article 441-11 of the Luxembourg law of 10 August 1915 on commercial companies, the tasks of the Executive Committee are, amongst others but not limited to, the following:

- Proposition of the general strategy of the Company to the Board of Directors, in order to achieve the Company's objectives, it being understood that the general strategy shall exclusively be decided by the Board of Directors,
- Determination and follow-up of the implementation of the strategic and operational objectives that ensures the effective application of the Company's strategy,
- Approval of the allocation of human and financial resources that are necessary for the achievement of the Company's objectives and approval on the human resources strategy,
- Coordination of the Company at operational level and communication with the management units of the Company (including with the Company's branch(es) and hubs),
- Discussion of monthly financial and operative performance of countries and hubs,
- Preparation of annual and quarterly closing of accounts and business plan in view of approval by the Board of Directors,
- Regular reporting to the Board of Directors,
- Information to the Board of Directors in case of material events affecting the Company.

Specific tasks and responsibilities delegated to the Dirigeant Agréé (Authorized Manager)

Amongst the members of the Executive Committee, the Dirigeant Agréé (Authorized Manager) is designated by the Board of Directors. This function is regulated under the Luxembourg law on insurance sector and the person designated has been agreed by the Commissariat Aux Assurances (CAA).

The Dirigeant Agréé is, in addition to his powers as member of the Executive Committee, also vested with overall responsibility as Dirigeant Agréé in relation to the daily management powers according to the limitations set forth in the Company's Articles of Association, and is the representative of the Company before the Commissariat Aux Assurances and other public administrations in Luxembourg. His tasks, competencies and responsibilities are aligned with applicable legislation, particularly tax and regulatory provisions. To be able to achieve his responsibilities, the Dirigeant Agréé shall have rights of information and objection on the matters in relation with the said responsibilities.

The following tasks (it being understood that such list is not exhaustive), competencies and responsibilities are assigned to the Dirigeant Agréé:

- The Dirigeant Agréé shall have rights of information towards the key functions, taking into account applicable laws and regulations.
- Representing the Company before the Commissariat Aux Assurances and other public administrations in Luxembourg, including material communication towards the CAA, the

- supervision and filing of regulatory reporting vis-à-vis the competent authorities in Luxembourg (including Solvency II).
- Approval (or pre-approval) of the policies of the Company to the extent approval is not required by the Board of Directors,
- Set-up of an internal control system ensuring the reliability of the internal reporting and of the financial reporting process,
- Management of the internal control function and procedures (in particular the independent controls),
- Set-up of an internal audit procedure and management of the internal audit function.

Main changes during the year

- Board of Directors: On 25th August 2022 the shareholders elected Andreas Frick as a new member of the Board of Directors. As of 2nd September 2022, the Board of Directors has the following members and composition:
 - Andreas Burki (Chairman)
 - Urs Bienz
 - Gert De Winter
 - Alain Nicolai (Dirigeant Agréé)
 - Andreas Frick
- Audit Committee: On 2nd September 2022, the composition of the Audit Committee was changed. Urs Bienz has been appointed as chairman of the Audit Committee and Andreas Frick as member of the Audit Committee. Andreas Burki is no longer member of the Audit Committee.
- Executive Committee: During the reporting period the composition of the Executive Committee has changed with two members leaving with effect as of 31 May 2022, Therefore, the number of members of FRIDAY's Executive Committee decreased from seven to five members.

Key Functions

The Company has appropriate key functions.

- They have the necessary privileges, resources, expertise and access within the organization;
- They are independent of the operational activity that they control;
- They report to the Dirigeant Agréé and non-executive directors;
- Their remuneration related to the results of the Company is not material.

The following key functions are in place at FRIDAY:

- Actuarial Function;
- Compliance;
- Internal Audit;
- Risk Management.

Composition of key functions

Internal Audit

The internal audit contributes to the good practice of corporate governance and helps the organization to achieve its goals by using a systematic, target-oriented approach to analyze, assess and report on the suitability and efficacy of the three processes of risk management, control and governance.

Internal audit works following the standards of the IIA (Institute of Internal Auditors) and the Baloise Group Internal Audit Manual. For the execution of specific tasks, cooperation with external and specialized auditors is required.

The domain of Internal Audit is the whole organization and its outsourced functions.

Internal Audit sets up a risk analysis over an annual basis, focused on global risks per domain.

The administrative organizational set-up of Internal Audit at FRIDAY takes into account the Company's size.

Internal audits by Baloise Group Internal Audit are also authorized. The effectiveness of audit and compliance functions is also evaluated by the Statutory Auditor who reports to the Audit Committee.

Additional information relating to the Internal Audit function is provided in the Chapter B.5 Internal Audit.

Compliance

The confidence of customers, partners and other actors of insurance and financial market is gained by the high level of values that a Company and its sector of activity are able to provide and their capacity to respect general rules.

Values such as attention to the needs and interest of the customer, integrity, honesty, customer's confidentiality, transparency regarding authorities, respect of laws or regulation are the basis of the code of conduct applicable at FRIDAY. The non-respect of these values can lead to a loss of business or reputation, compensation regarding customers, fines or other sanctions from any supervisory authority including the cessation of activities.

For several years, FRIDAY and Baloise Group have implemented an organization that promotes the respect of these values and rules. It is particularly the mission of the management with support of the Compliance Function Holder to ensure that they are followed.

The Compliance Function Holder must have sufficient knowledge for the function and the necessary authority to propose, on his own initiative, to the Dirigeant Agréé the adequate measures to implement. The Compliance Function Holder must respect high standards with respect to integrity, honesty, and reputation. Information made available to Compliance Function Holder must be treated as confidential under consideration of the respective sensitivity level.

In order to underline his independence, the Compliance Function Holder reports directly to the Dirigeant Agréé, Board of Directors or Group Compliance without justifying his actions.

The Compliance Function is firstly orientated to the compliance of the Company with laws and regulations that are related to the integrity of the insurance business, including the code of conduct. The task of the Compliance Function Holder consists of checking, judging and encouraging these values.

Special attention is given to the prevention and proactive operating realized by advising, awareness, stimulating and facilitating. These objectives are realized by making available all important procedures, legal information of the companies and extracts from the law to the employees of the Company.

Cooperation with the Baloise Group is strong and based on the following principles.

- The Baloise Group Compliance Officer sets up standards.
- The Baloise Group Compliance Officer maintains a network in which Compliance Officers can exchange their knowledge and experience.
- The Company's Compliance Function Holder delivers his reports to the Group Compliance Officer.

Strategic tasks

- Implementation of and adherence to the Group Compliance Policy and the Compliance Controlling Guideline.
- Issuing of policies and regulations on compliance subjects.
- Creation of a Compliance Plan (annual planning of compliance activities for local business on the basis of a "risk-based approach").

Guidance and support

- Guidance and support of the Executive Committee (in particular to the Dirigeant Agréé) in the exercise of the responsibility for compliance.
- Assurance and coordination of contact with the regulatory authorities on compliance-relevant subjects.

- Central point of contact for employees for questions and reports in connection with the code of conduct.
- Regular information and specialist guidance for the employees.

Monitoring

- Due monitoring of the adherence to internal and external (regulatory) provisions.
- Analysis of work processes and identification, assessment and monitoring of existing compliance risks.
- Observation of the local legal development and assessment of possible effects of material planned changes on the Company's activity. Early notification of Group Compliance in the event of material changes.
- Co-determination right or escalation right (if approval is not granted by Compliance) for individual subjects such as new products, markets and services.
- Processing of compliance-relevant incidents that have occurred.

Reporting

- Regular reporting with respect to the compliance activity and compliance risks according to the Compliance Controlling Guideline to the local management/the board and to Group Compliance and ad-hoc reporting to these authorities in the event of material compliance-relevant incidents which might result in criminal proceedings of employees or of the Company, regulatory measures or reputational damage.

Risk Management

The Risk Management Function supervises and monitors the different risks of the Company and reports regularly to the ALCO-RICO (Asset Liability and Risk Committee), the Dirigeant Agréé and the Board of Directors. The Risk Management Function holder should also report on other specific areas of risks both on its own initiative and following requests from the Audit Committee.

The set-up of the Risk Management framework is taking the scale and size of the Company into account (proportionality principles). The Risk Management Function holder can address himself directly to the Audit Committee when required. These privileges must guarantee the independence of the Risk Management and should prevent possible operational conflicts of interest.

With respect to the Risk Management, the Company applies the Group-wide Risk Management Standards. These standards are related to organization, responsibilities, methodologies, rules, limits, controlling and reporting. The Risk Management is based upon these standards together with additional legal requirements requested by the supervisor.

The Risk Management function holder is responsible for the operational execution of the Risk Management policy. This includes:

- Advising the Dirigeant Agréé with respect to the strategic set up of the risk policy.
- Executing concretely and watching over a proactive risk approach.
- The implementation of an integrated Risk Management system.
- The practice of risk controls.
- Awareness and training of employees regarding Risk Management aspects.
- Risk measurement, monitoring and management under consideration of group guidelines and local constraints
- Reporting to ALCO-RICO, Dirigeant Agréé, Board of Directors, Audit Committee and Baloise Group Risk Management.
- Coordinating the ORSA report to be submitted to the Audit Committee and Board of Directors
- Ensure regulatory compliance with Solvency II risk framework and capital requirements.

Actuarial Function

The Actuarial Function assists the management by

- Advising on the actuarial methods used for pricing, the set-up of the technical reserves and reinsurance for the launch of a new product or repricing that can influence the profitability of these products.
- Giving annual advice on the profitability of the products, the Technical Provisions, reinsurance.
- Informing the Dirigeant Agréé and the Board of Directors of the reliability and adequacy of the calculation of Solvency II Technical Provisions.
- Producing a written report to be submitted to the Board of Directors on an annual basis. The report shall document all tasks that have been undertaken by the actuarial function and their results and identifies any deficiencies and gives recommendations as to how such deficiencies should be remedied.

The Actuarial Function requires good qualification and necessary knowledge and experience of the applicable standards.

The Actuarial Function also fulfills prudential tasks, for example it certifies the model and methods used in the Company that are communicated to the CAA.

Main changes related to key functions

In 2022, the Company has internalized three of the key functions that were previously filled by shared services employee working also for Baloise Luxembourg:

- The Actuarial Function Holder has been appointed with effect as of 1st January 2022.
- The former Risk Management Function Holder left the Group with effect from 1st April 2022. On an interim basis the Risk Management Function was owned by the Managing Director Insurance & Finance until 1st October, when the new Risk Management Function Holder was appointed.

- The Managing Director Legal & Compliance took over the Compliance Function on an interim basis until 1st October, when the new Compliance Function Holder has been appointed.

All the key function holders are located in Luxembourg.

Sustainability Network of Baloise Group

Since 2019, Baloise has a sustainability network in place. It consists of representatives from all Baloise business areas with the necessary knowledge to develop and update the content of the sustainability strategy regularly.

FRIDAY actively support environmental protection and focuses on sustainable and responsible actions. We integrate sustainability into many areas of our business activities and processes. We deal responsibly with employees, customers, partners, investors, the environment, and society. Already in 2018, we offered our customers an ECO tariff by which they could offset their car's CO2 emissions. In 2020, FRIDAY itself became fully CO2 neutral. This remains an integral part of our strategy and, therefore, we as an insurance company will strive to fulfil this responsibility also in the future.

Since October 2018, FRIDAY customers have been able to contribute to climate protection by offsetting their CO2 emissions generated by driving. FRIDAY's German branch was able to offset 4,032 tons of CO2 and other harmful greenhouse gases such as methane and nitrous oxide between April 2021 and March 2022 thanks to the "FRIDAY+ECO" product.

This is an increase of around 1,800 tons or more than 80 percent compared to prior year. The selected climate protection projects for compensation meet the highest standards.

B.1.2. Remuneration policy

Remuneration principles and objectives

Principles

The Company's success is largely dependent on the skills, capabilities and performance of its workforce. It is therefore essential to recruit, develop and retain suitably qualified, highly capable and highly motivated professionals and executives. The level of remuneration offered by the Company is in line with the going market rate and performance related. The Baloise Group has put in place a remuneration policy that affects also key persons of the Company. The policy was approved by the Board of Directors.

Objectives

The objectives of the remuneration system are to further increase the emphasis on performance at the Company and to strengthen employees' and executives' loyalty and commitment to the organization.

In addition to paying its staff in line with market rates and according to individual achievement, the Company encourages its executives to focus on the longer term and on its shareholder's interests.

Remuneration components

The Company views its compensation packages in its entirety and therefore factors in not only the basic salary plus short- and long-term variable remuneration but also other material and non-material benefits such as pension contributions, additional benefits, and staff development.

Members of the Company's Board of Directors do not receive remuneration from FRIDAY, but from other Baloise Group companies. Accordingly, both remuneration systems are explained.

Sustainable remuneration and short-term variable remuneration

Considerable importance is attached to managing the business sustainably and retaining high performers. It also matters to FRIDAY that its remuneration is not only competitive and achievement-oriented, but that it also encourages managerial staff to align their long-term focus with the interests of stakeholders, particularly the shareholders. To this end, the remuneration system provides for a significant portion of the variable remuneration to be awarded in shares that are restricted for three years and exposed to market risk during this period. These subscribed shares promote risk awareness and encourage an economical and sustainable work-ethic. The key factors determining the amount of short-term variable remuneration paid are the Company's profitability and economic value added, team-performance and the employee's individual contribution to it.

Basic salary

The basic salary constitutes the level of remuneration in line with the functions and responsibilities of the position concerned as well as the skills and expertise required to achieve the relevant business targets and objectives. When determining the level of basic salaries, FRIDAY aims to position itself around the market median. In compliance with its code of conduct FRIDAY applies the internal fair-pay principle that people who do the same job and have the same qualifications should be paid the same amount.

Performance pool

The short-term variable remuneration is allocated via the performance pool. The performance pool takes account of the entire Baloise Group's performance; its amount is determined by the Remuneration Committee of Baloise Group after the end of the financial year concerned, using a systematic analytical process considering different indicators.

The individual allocation for the members participating in the performance pool is set by the Remuneration Committee. In principle, the most senior management level of the whole Group, as well as the respective functions abroad are considered for the performance pool. Performance pool remuneration is only applicable to members of the Board of Directors, including the Dirigeant Agréé.

Long-term variable remuneration

In addition, the Baloise Group grants performance share units (PSUs) to the most senior managers of Baloise Group as a form of long-term variable remuneration. The PSU program enables the top management level to benefit even more from the Company's performance and helps the Baloise Group to retain high performers in the long run.

Long-term variable remuneration is only applicable to the members of the Board of Directors, including the Dirigeant Agréé.

Phantom stock option plan

In 2017, FRIDAY introduced a Phantom Stock Option Plan (PSOP) as long-term variable remuneration instrument for key personnel, that ended at the end of 2020. The PSOP allowed employees to participate in the long-term development of the Company's value via virtual stock options and, hence, aligned the interests of employees with the interests of FRIDAY and its shareholders without diluting the Company's share capital. Employees participating in the PSOP received virtual stock options after fulfilling specified vesting criteria. The stock options were or will be settled by cash payments in case the required vesting criteria are met.

Employee stock option plan

In 2021, FRIDAY introduced an Employee Stock Option Plan (ESOP) as long-term variable remuneration instrument for key personnel. The ESOP allows certain beneficiaries to participate in the long-term development of the Company's value via stock options and, hence, aligns the interests of employees with the interests of FRIDAY and its shareholders.

Employees participating in the ESOP are awarded stock options that are subject to certain vesting criteria. Stock options will generally be settled by delivery of shares, provided that the options are in-the-money and all required vesting criteria are met.

Pension schemes

The Company offers a pension solution in Luxembourg in form of defined contributions as part of the 2nd pillar, which fulfils the following objectives:

- It meets the requirements of the insured should the following risk events occur: old age, death or invalidity;
- It permits an appropriate maintenance of a lifestyle enjoyed to date with a sufficiently high substitution rate (1st and 2nd pillar benefits combined) to replace discontinued earnings;
- The employer makes an average contribution to financing of occupational pensions;
- It is forward-looking, sound, can be calculated and is reasonably priced;
- Defined contributions depending on age of insured as well as function within the organization.

The Dirigeant Agréé as well as one of the key functions are insured in the pension scheme because they are also employees of Baloise Luxembourg.

B.1.3. Material Transactions

Over the reporting period the following material transactions with shareholders took place:

In an extraordinary general meeting held on 08th April 2022, Baloise (Luxembourg) Holding S.A. contributed EUR 25,000 thousand to finance a capital increase and to subscribe 1,425,314 shares of FRIDAY Insurance S.A – each having a nominal value of EUR 1 -. As a result, EUR 23,574.7 thousand were added to other reserves. The number of overall shares increased accordingly to 15,014,614 from 13,589,300. Following completion of the capital increase, Baloise holds 88.61% of the shares. The other shareholder SevenVentures holds 11.39% of the shares.

Over the reporting period, there were no material transactions with persons exercising a significant influence on the Company or with members of the Board of Directors, the Dirigeant Agréé, the members of the Executive Committee and the General Representative of the German branch or French branch.

B.2. Fit and proper requirements

B.2.1. Fit and proper: Policy and process

Fit and proper principles and objectives

The Company has a Fit and Proper Policy in place which defines the procedure for assessing the fitness and propriety of persons who are effectively running the Company or hold a key function.

The critical function holders which are in scope of the policy include the members of the Board of Directors, the Executive Committee (including the Dirigeant Agréé) and the General Representatives of the German and French branches, as well as the key function holders for Risk Management, Compliance, Internal Audit and the Actuarial Function.

In 2022 the necessary evidence regarding the fitness and the propriety for the Risk Management Function, the Compliance Functions and two new members of the Board of Directors have been provided to the CAA prior to their appointment.

Assessment process of key personnel

Fitness Check

Recruitment processes include application and assessment methodologies that ensure previous experience, qualifications, knowledge and skills are all taken into account, with specific references to the competences defined in the job description or role profile.

It is ensured that the management body has the breadth of expertise and experience to understand and continually challenge the Company's business operations, strategic initiatives and major transactions.

The collective knowledge, competence and experience of the management body include awareness and understanding of:

- The wider business, economic and market environment in which the Company operates;
- The Company's business strategy and business model;
- The system of governance (risk management, oversight & controls);
- The financial and actuarial analysis;
- The regulatory framework, requirements and expectations relevant to it.

For external recruits and internal persons promoted to a position in scope of the Fit and Proper Policy, superiors and human resources assess their fitness according to the specific requirements set out in the job description. The superior makes the final decision on a person's required fitness.

Propriety Check

The Company requires that a range of specific checks are undertaken for critical function or key function holders, designed to verify that the candidate is honest, of integrity, financially sound and of good reputation.

The Company imposes a range of requirements at the recruitment stage for new employees for critical functions or key functions or in case of internal promotions. Documentation related to the above verifications should to the extent possible be requested and reviewed by human resources prior to an employment agreement being executed. Formal notes of face-to-face interviews, during which characteristics of propriety are also verified, are prepared by the personnel conducting the interview.

The principles applicable at original appointment, to ensure the key function and critical function holders are honest, financially sound and of good reputation, apply on an ongoing basis as well.

All critical and key function holders are required to undertake a code of conduct training on subjects such as regulatory awareness, insider trading, anti-money laundering, and others. The Compliance Function organizes regular trainings on the code of conduct.

The Fit and Proper Policy requires an initial and yearly assessment. They include a self-declaration, a sample of the criminal record, a copy of the passport and a Curriculum Vitae.

Adequacy of Administrative and Supervisory Body

The appointment of Board of Directors members and the Executive Committee members (including the Dirigeant Agréé) is based on a number of key requirements to ensure a sufficient mix of qualifications, competencies and relevant expertise is available to fulfil their responsibilities.

B.3. Risk management system including the ORSA

B.3.1. Risk management system overview

The Company has suitable processes, models and structures in place in order to fulfil the need to continuously develop the risk management capabilities as the situation requires and to therefore achieve the optimal result for FRIDAY. Integrated risk management uses synergies across the group effectively.

Risk Management Function holder reports to the Dirigeant Agréé. he has direct access to the local Board of Directors through the Audit Committee which further guarantees its independence. The responsibilities of the Risk Management is described in chapter B.1.

The decision-making body for all questions relating to risk management is the local Risk Committee (ALCO-RICO).

Risk Strategy

The risk strategy is considered the cornerstone of the risk management organization. The aim of the risk strategy is to consciously steer the risks taken within defined ranges. Particularly, it aims to harmonize market-based considerations on the one hand and strategic risk concerns on the other hand. Central to the risk strategy is the term "Risk Appetite" which defines the extent to which the Company is willing to take on risk in order to achieve strategic goals. Its main components are:

- Compliance with regulatory requirements and capital protection;
- Protection of the Profit and Loss Statement of Income

Risks considered as relevant for the Company are classified along the so-called "Risk Map" of the Baloise Group. The categorization is performed on three levels:

- Risk category;
- Risk subcategory;
- Risk type.

Risk Map

In order to monitor and steer the risks listed in the Risk Map, Baloise has implemented an extensive group-wide risk management. A holistic approach of an integrated risk management in order to identify, administer and assess risks in the areas internal control, compliance and risk management as well as risk steering is pursued. In addition to purely financial risks, operational as well as strategic and reputational risks are captured and quantified. In this manner, risk management is consistently embedded in the decision-making process. The effectiveness of the risk management becomes visible through amongst others the occurred risks and the effectiveness of the measures taken. The risk management and the respective systems and processes are further developed and revised on a continuous basis in order to guarantee long-term efficiency and continuous improvement.

B.3.2. ORSA Process

ORSA Compliance

The purpose of the Company's Own Risk and Solvency Assessment (ORSA) is to provide a comprehensive overview of all risks the Company is exposed to or could be exposed to in the future, show the way these risks are managed and assess the overall capital requirements needs resulting thereof.

ORSA Governance

The Dirigeant Agréé has the overall responsibility for the execution of the ORSA and has to ensure that results are taken into account in the management of the Company. In addition, the Board of Directors is responsible to ensure and verify that the ORSA process is appropriately designed and implemented. After the validation of the ORSA report by the ALCO-RICO, the Board of Directors receives and approves the ORSA report before submission to the regulator.

ORSA Process

The full ORSA reporting process is performed once a year resulting in the review and approval by the Board of Directors. Despite the scheduled reporting process, the ORSA as such is a continuous process in which risk management evaluates the impact of strategic decisions on the overall solvency needs. The process is tailored to fit into the FRIDAY's organizational structure and risk management system. In addition to the annual ORSA report, an ad-hoc reassessment is performed whenever the risk profile changes significantly.

FRIDAY's own risk and solvency assessment is developed by risk controllers who determine in collaboration with risk owners the risk's probability of occurrence and the potential loss caused by a specific risk. Any risk is then classified according to established limits. A risk grid ("Heat map") maps the standalone risks in connection with the limit system. Should a corresponding threat result, according measures are defined.

Documentation

The ORSA is documented in the ORSA report, which contains integral management information that is essential for the review and approval by management.

Review and approval

The results of the ORSA are discussed in the ALCO-RICO and could result in decisions and actions, for which the Risk Management Function ensures the corresponding follow-up.

If the ORSA identifies that the risk profile is not appropriate for the Company, or the risk profile significantly deviates from the basic assumptions of the Solvency Capital Requirements calculation, or the governance arrangements are inadequate, the ALCO-RICO has to set up appropriate action plans for remediation.

The submission of the ORSA report to the regulator is required within two weeks after the approval by the Board of Directors.

Interaction Capital Management and Risk Management System

On an annual basis a business plan is set up. The projection of the related Solvency Capital Requirements ("Forward Looking Solvency Position") is integrated in the business plan process. Risk increasing initiatives defined in the business plan process are reflected in the forward-looking considerations. The Company is in the position to judge if the risks can be accepted without endangering its Solvency position. A set of stress tests scenario are also defined and performed

to assess their impact on the FLSP. They are part of the ORSA process and also discussed as part of the conclusions of the report.

B.4. Internal control system

B.4.1. Internal control system overview

The Company's internal control system is established as a key component of the integrated risk management framework. Effectiveness, traceability and efficiency of the implemented measures as well as concentration on the relevant risks are considered as important principles for the design and application of internal control. The Company's internal control system covers the financial reporting as well as compliance and operational risks.

The Company's internal control system pursues the objectives of compliance with laws and regulations, reliability of financial reporting and guaranteeing effective business processes in order to support obtaining company goals. With the implementation of the internal control system, the Company aims to raise risk awareness on all company levels and to focus on the identification and steering of essential risks that could threaten proper operational processes and therefore the Company's success.

Depending on the risk type to be considered, the Company applies entity-wide controls, general IT controls and process controls in its internal control system. Measures are integrated in business processes and are performed on all relevant levels of the Company. The effectiveness is measured on a regular basis and appropriate measures are initiated in case of shortcomings.

For its implementation of the internal control system, FRIDAY follows the Baloise Group's approach for an effective internal control system, for which the Baloise Group's Board of Directors is responsible. It defines the objectives, the scope as well as the expansion level of the internal control system. Furthermore, it has to assure an appropriate monitoring regarding the efficiency of the internal control system by the Dirigeant Agréé and receives a regular reporting.

B.4.2. Compliance Function

The Company's essential compliance themes are based on the Compliance Standards as referred to in the Baloise Group Compliance Policy. The Compliance Standards include specifications and control objectives for different key topics. Relevant key topics for the Company are: data protection and data security, insider trading, embargo/sanctions, anti-trust law/competition law, fraud (including code of conduct), advisory services, corruption/bribery, and supervisory law) that constitute the basis for controlling and regular compliance reporting.

Objectives

The Compliance Function aims to ensure the Company's compliance with the laws and regulations in relation with the integrity of the Company as an insurance company, including the Company's

code of conduct. It is the Compliance Function Holder's task to examine, assess and encourage this compliance.

Moreover, special attention is paid to prevention and acting proactively by amongst others providing advice and raising awareness.

Roles and responsibilities

The Board of Directors fosters honorable conduct. Within the framework of its supervisory duty, the Board of Directors regularly verifies whether the Company has a suitable compliance policy and corporate values, as well as an appropriate independent Compliance Function.

At least once a year, the Board of Directors verifies whether the compliance risks are identified and controlled adequately, and that the compliance policy is suitable for the Company's activities.

The Dirigeant Agréé with the support of the Compliance Function Holder develops a compliance policy and updates it regularly. This policy defines the Company's objectives and identifies and analyses the risks that the Company runs in this domain.

The Compliance Function Holder is responsible for implementing the compliance policy. It is the Compliance Function Holder's duty to examine, assess and encourage the observance of the Compliance policy.

The Compliance Function Holder guides and supports the Dirigeant Agréé and provides explanations about the implementation of the compliance policy to the Dirigeant Agréé. The Compliance Function Holder's tasks include proceeding from his expert and advice function, implementing the compliance policy, reporting to third parties on compliance topics as well as reporting to the Dirigeant Agréé, as well as the Board of Directors and the Baloise Group Compliance Function Holder regularly.

The key aspects of the compliance policy are comprised, amongst others, of

- drawing up an annual action plan;
- assessing internal guidelines and procedures;
- raising awareness among all employees about the compliance policy and training them in this area;
- supervising and testing observance of the compliance rules; formulating compliance recommendations;
- investigating and following up infringements of laws, regulations and deontological codes; the observations are derived from random checks and when the occasion arises in collaboration with Internal Audit;
- fulfilling the duties to report to third parties on compliance topics;
- reporting to the Dirigeant Agréé, Board of Directors and Baloise Group Compliance Function Holder (at least once a year).

Functioning

In order to guarantee the function's independence, the Compliance Function Holder has direct access to the Dirigeant Agréé, the Chairman of the Board of Directors, the members of the Audit Committee and the Statutory Auditor, without needing to give justification and on its own initiative.

The Compliance Function Holder reports to the Dirigeant Agréé the Board of Directors and Baloise Group's compliance officer at least once a year about compliance risk assessment, compliance realizations, principal attention points and scheduled activities for the following period.

B.4.3. Internal Audit Function

B.4.3.1. Internal Audit: organization and governance

Internal Audit objectives and policy

The Internal Audit contributes to the good practice of corporate governance and helps the organization to achieve its goals by using a systematic, target-oriented approach to analyse, assess and report on the suitability and efficacy of the three processes of risk management, control and governance.

The internal audit policy describes the governance of the Internal Audit Function (intervention scope, governance, roles and responsibilities) as well as its organization (objectives, assignment, powers, activity, competence of internal auditors, reporting, collaboration with Baloise Group Internal Audit, collaboration with other control functions and quality control). All internal employees can consult the policy on the intranet.

Internal Audit organizational structure

Internal Audit is an element of Corporate Governance and an instrument of the Board of Directors. It supports the Board of Directors in performing its top-level management function. In this capacity, the Internal Audit performs its tasks on behalf of the Chairman of the Board of Directors and of the Audit Committee (an organ of the Board of Directors). Regular exchanges are held between internal auditors and Audit Committee.

Internal Audit is organizationally independent of any operating activities. The person carrying out the Internal Audit Function does not assume any responsibility for any other function.

Internal audit functioning, main roles and responsibilities

The Internal Audit area covers the systematic assessment of the adequacy and effectiveness of the quality of the internal control system. On the one hand, the Internal Audit ensures that the processes take place as intended and supports the achievement of the Company's objectives. On the other hand, recommendations are made to improve the efficacy, efficiency and profitability of these processes.

Internal audit possesses extensive, unlimited rights to information, inspection and control, which are necessary for it to fulfil its assignments.

Internal Audit applies the standards of the Institute of Internal Auditors (IIA) and of the Baloise Group Internal Audit. It is under the prudential supervision of the CAA.

B.4.3.2. Independence of Internal Audit

Independence principles/criteria

Primarily the “independence” of control functions means that:

- They have an appropriate constitution with the necessary powers, resources, expertise and access within the organization.
- They are hierarchically and organizationally independent from the operational activity to which they relate.
- They report both to executive and non-executive boards in accordance with the established procedures.
- The remuneration of the persons entrusted with these functions is not connected with the profitability of the activity involved.

Internal Audit Function position within the organization

Internal Audit is organizationally independent of any operating activities. The person carrying out the Internal Audit Function does not assume any responsibility for any other function and is an independent assessor of the quality of the internal control system.

Reporting arrangements

Internal Audit has unrestricted access to the Dirigeant Agréé and to the Audit Committee.

The Internal Audit Function can escalate any conclusions to the Board of Directors via the Audit Committee.

B.4.4. Actuarial Function

B.4.4.1. Organization and key responsibilities

Actuarial policy and objectives

Detailed regulatory guidance defines the role and responsibility of the Actuarial Function. FRIDAY has implemented this model.

Key objectives of the Actuarial Function are to

- ensure proper data, models and processes to calculate the Technical Provisions in accordance with Solvency II;
- comment on the appropriateness of an insurer's underwriting and pricing policy;
- comment on the appropriateness of an insurer's reinsurance program, and to
- contribute to risk management.

Organization structure

The Actuarial Function reports directly to the Dirigeant Agréé.

The Actuarial Function holder fulfills all fit and proper criteria including the internal criteria regarding necessary knowledge and experience of the applicable standards.

Roles and responsibilities

The Actuarial Function is required to report in writing to management at least once per year on the function's key objectives as stated above. Any such report shall document all tasks that have been undertaken by the Actuarial Function as well as their results and shall clearly identify any deficiencies and give recommendations as to how such deficiencies should be remedied.

B.5. Outsourcing

B.5.1. Outsourcing policy and key aspects

Overview of the outsourcing policy

The Outsourcing Policy defines principles and procedures prior, during and after an outsourcing. It ensures that the interests of all relevant stakeholders are considered by prohibiting outsourcing in case one of the following occurs:

- Endangerment of the continuous and satisfactory provision of services to customers;
- Significant impairment of the quality of the Company's processes;
- Unduly increase in operational Risk;
- Endangerment of the functioning of the governance system;
- Impairment of the ability to monitor compliance with the Company's obligations.
- The principles cover topics such as responsibility, requirements on the skills and resources of the provider and its continuous monitoring, compliance with laws and regulations and minimum contractual contents.

The outsourcing policy further demands that several pre-defined stages have to be completed for any service or function to be outsourced. First, the current state shall be analysed on whether the function or process is legally and economically viable to be provided by a third party. After the

decision has been made in favor of outsourcing, a formal tender begins. After the most suitable bidder is chosen and the contract signed, the outsourcing shall be integrated in the governance framework of the Company. The business relationship shall be actively managed in line with its nature and scope. This includes the monitoring and control of the services provided, the data security and the risk situation as well as the evaluation whether the external service provider has implemented adequate emergency plans (Business Continuity Plan).

Critical and important outsourced services

The Company does not outsource key functions. The following critical and important services are (partially) outsourced.

Outsourced Activity	Location of Service Provider	Internal / External
Investment advice	Switzerland	Internal
Claim handling and customer service	Germany, France	External
Contract administration	Germany	External
Computation resources and data storage	Luxembourg	External

"Investment advice" concerns intragroup outsourcing.

B.6. Adequacy of the system of governance

The system of governance in place at FRIDAY is considered as adequate to the nature, scale and complexity of the risks inherent in the Company's business. Adequacy is confirmed through the governance principles in line with regulatory requirements. Furthermore, the fit and proper process applied, together with the Company's code of conduct ensures the adequacy of key personnel.

B.7. Any other information

No supplementary information or risks in addition to the information previously disclosed is considered as material.

C. Risk Profile

C.1. Underwriting Risk

For FRIDAY non-life underwriting risk is the risk arising from non-life insurance obligations including health underwriting risk similar to non-life. Hereafter, underwriting risk is referred to in relation to the perils covered and the processes used in the conduct of business. The non-life underwriting risk is related to the core business of the Company, namely the premium and reserve risk and the catastrophe risk.

This risk refers to uncertainty as to the occurrence, amount and timing of insurance liabilities. In particular underwriting risk arises from the possibility that premiums are not sufficient to cover future claims, contract expenses and extremely volatile events.

As of year-end 2022 FRIDAY's capital requirements for non-life underwriting risk amount to EUR 3,501.7 thousand as measured by the Solvency II standard formula. The non-life underwriting risk is composed of premium and reserve risk as well as catastrophe risk which are described below in more detail. The largest share of the underwriting risk stems from the premium risk.

As of year-end 2021, the capital requirement for non-life underwriting risk was reported at EUR 3,616.4 thousand. The slight variation in YE2022 is mainly driven by the decrease of the reserving thanks to continuous improvement of our past claims experience and also a better diversification of the risk due to the development of the activity in France and a slight increase of the home content and private liability proportion in the portfolio mix.

C.1.1. Risk Exposure

The non-life business of the Company consists of the following lines of business (LOB) according to the definitions applied by Solvency II:

Income protection insurance (LOB2): Income protection insurance obligations where the underlying business is not pursued on a similar technical basis to that of life insurance;

Motor vehicle liability insurance (LOB4): Insurance obligations which cover all liabilities arising out of the use of motor vehicles operating on land;

Other motor insurance (LOB5): Insurance obligations which cover all damage to or loss of land vehicles;

Fire and other damage to property insurance (LOB7): Insurance obligations which cover all damage to or loss of property other than those included in the lines of business 5 and 6 due to fire, explosion, natural forces including storm, hail or frost, nuclear energy, land subsidence and any event such as theft;

General liability insurance (LOB8): Insurance obligations which cover all liabilities other than those in the lines of business 4 and 6;

Legal Expense Insurance (LOB 10): Legal insurance obligations which cover legal expenses and cost of litigation;

Assistance (LOB11): Insurance obligations which cover assistance for persons who get into difficulties while travelling, while away from home or while away from their habitual residence.

Assistance is not offered as standalone product but only as product integrated into the motor insurance (LOB4 and LOB5).

Miscellaneous financial loss (LOB 12): Insurance obligations which cover employment risk, insufficiency of income, bad weather, loss of benefit, continuing general expenses, unforeseen trading expenses, loss of market value, loss of rent or revenue, indirect trading losses other than those mentioned above, other financial loss (non-trading) as well as any other risk of non-life insurance not covered by the lines of business 1 to 11.

The non-life underwriting risk is primarily dominated by premium and reserve risk. Premium risk only relates to future claims and reserve risk only relates to already incurred claims. Both risk categories originate from claim sizes being greater than expected, differences in timing of claims payments from expected, and differences in claims frequency from those expected.

Premium and reserve risk

Premium risk is the risk that calculated insurance premiums are based upon wrong assumptions resulting in insufficient premiums to cover the related small risks (frequency uncertainty). This risk is covered by the standard formula and the calculation is mainly based on the level of premiums by line of business.

The following table contains the net earned premiums by line of business during the year 2022.

Non-Life Net Earned Premiums

	2022
EUR '000	
Income protection insurance	30,0
Motor vehicle liability insurance	4.810,9
Other motor insurance	4.890,4
Fire and other damage to property insurance	429,7
General liability insurance	- 273,4
Legal Expenses	0,7
Assistance	60,2
Miscellaneous financial loss	0,1
Total	9.948,6

It should be noted that the net premiums earned for the General liability insurance business are negative due to an additional provision for unexpired risks (URR) included into the account due to portfolio development.

The reserve risk results from fluctuations in timing and amount of claims settlements. This risk is covered by the Solvency II standard formula and the exposure is mainly driven by the volume of reserves by line of business.

The following table contains the net Best Estimate reserves by line of business as of year-end 2022.

Non-Life Net Best Estimate

	2022
EUR '000	
Income protection insurance	-14.0
Motor vehicle liability insurance	7,200.4
Other motor insurance	2,443.5
Marine, aviation and transport insurance	-
Fire and other damage to property insurance	875.3
General liability insurance	1,188.3
Legal expenses insurance	0.8
Assistance	-12.2
Miscellaneous financial loss	-0.2
Total	11,682.0

The main exposure of premium and reserve risk stems from the more material lines of business of the Company.

Catastrophe risk

The non-life catastrophe risk is the risk that a single event, or series of events, of major magnitude, usually over a short period, leads to a significant deviation in actual claims from the total expected claims. The Company is exposed to the following risks:

- Natural catastrophe risk;
- Man-made catastrophe risk;
- Other non-life catastrophe risk.

C.1.2. Risk Concentration

The concentration risk in non-life business may arise due to a concentration of business written within a geographical area, of a policy type, or of underlying risks covered.

The underwriting activity of the Company is limited to the German and to the French market, with a concentration on the German market during the reporting period. Therefore, only a limited geographical diversification exists at the level of the Company.

C.1.3. Risk Mitigation

The insurance risk (and particularly the catastrophe risk) is mitigated by reinsurance. Treaties subscribed by the Company are treaties by excess of loss and by quota share, i.e. non-proportional as well as proportional reinsurance is applied. The reinsurance program aims to optimize the reinsurance strategy and to protect the Company from a peak of exposure. This program is setup and placed on the market in cooperation with Baloise Group Reinsurance and reinsurance brokers.

The sufficiency of premiums (premium risk) is mitigated by an effective product development process and a regular profitability analysis on a product-by-product basis. Mitigation measures are derived in case the portfolio differs from the tariff basis to prevent lasting damage to the Company. In addition, the IFRS liability adequacy test ensures the sufficiency of premiums under the IFRS accounting standard.

In order to avoid attracting or retaining high risk profiles (anti-selection risk), several actions are taken:

- **Tariff segmentation:** Tariffs are calculated so that the premium offered to the customer is adapted to the actual risk.
- **Bonus Malus:** A bonus malus system is in place for the car products to adjust the premium in case of deviation of the risk.
- **Exclusion of risks:** Home located in highly exposed flooding and wood fire areas are not accepted for the MRH business.
- **Term of contract of one year:** The term of contract is at most one year for all products which enables a timely reaction to introduce mitigating measures in relation with the portfolio management in case needed.

C.1.4. Risk Sensitivity

FRIDAY applies various sensitivity and scenario analysis to those parameters that influence the underwriting risk. The analysis comprises the differing stress levels to each parameter according to Solvency II.

The principal driver of the underwriting risk is the premium and reserve risk which is directly related to the volume of premiums and reserves.

The stress tests considered for premium risk, reserve risk and catastrophe risk did not result in a Solvency II Ratio below 100% on a standalone basis.

C.2. Market Risk

Market Risk is the risk associated with the balance sheet positions where the value or cash flow depends on financial markets. It is reflected by losses that arise from changes or fluctuations in market prices. The degree of risk depends on the extent to which market prices fluctuate and on the level of exposure.

Risk factors include:

- Equity market prices;
- Property market prices;
- Interest rate risk;
- Credit spread changes;
- Currency exchange rates;
- Concentration risk.

As of year-end 2022, the global market risk for the Company amounts to EUR 2,297.8 thousand. It is mainly driven by the interest rate risk and the spread risk as stated below:

Gross SCR for Market Risks

	2022
in '000 EUR	
Interest rate risk	2,213.2
Equity risk	41.9
Property risk	-
Spread risk	496.8
Market risk concentrations	103.5
Currency risk	63.3
Diversification within market risk module	-620.9
Risk-Module level values	2,297.8

The following sections specifically address the interest rate risk, foreign currency risk, equity risk, spread risk, property risk and concentration risk that are relevant for the Company.

As of year-end 2021, the capital requirement for market risk was EUR 2,291.8 thousand. The Market Risk is stable during the reporting period mainly explained by the decrease of bond investments compensated by the increase of the interest rates.

C.2.1. Risk Exposure

Interest rate risk

Interest rate risk is the risk that the Company's interest margin, and therefore its income, may be reduced by fluctuations in money-market and capital-market interest rates (income effect), or

that the fair value of a portfolio of interest- rate sensitive products may decline (asset-price effect).

As of year-end 2022 the interest rate sensitive exposure of our own assets amounts to EUR 2,213.2 thousand under the Solvency II framework.

Foreign currency risk

The foreign currency risk describes the potential financial loss generated by changes in the exchange rates between currencies. The extent of the effective currency risk depends on:

- Net foreign currency exposure, i.e. the balance between currency assets and liabilities.
- The volatility of the respective currencies.
- The correlations of currencies with other risk parameters in the portfolio context.

As of year-end 2022 the exposure to this risk is very limited and mainly driven by reinsurance arrangement with Baloise Group in CHF and an IT service contract in USD. Also FRIDAY Technology Sp. z o.o. is exposed to a currency risk in PLN.

Equity risk

The Company is exposed to risks from price fluctuations on equity securities. Equity risk exposure includes common stocks, linked to equity unit trusts.

As of year-end 2022 the Company has a very limited equity exposure stemming from the investment into FRIDAY Technology Sp. z o.o.

Spread risk

Spread risk arises from the sensitivity of the values of assets, liabilities and financial instruments to changes in the level or in the volatility of credit spreads over the Risk-free Interest Rate term structure.

As of year-end 2022 the spread sensitive exposure of our own assets amounts to EUR 496,8 thousand. This exposure is decreasing compared to the previous year due to the reduction of the corporate bonds.

Property risk

The property risk arises from investments in real estate due to negative developments with respect to the level or the volatility of market prices.

The Company's own assets are not exposed to property risk as of year-end 2022.

C.2.2. Risk Concentration

Market risk concentration risks can stem either from lack of diversification in the asset portfolio or from large exposures to default risk by a single issuer of securities or a group of related issuers.

As of year-end 2022 the concentration risk within the market risk of the Company is very limited and amounts to EUR 103.5 thousand.

C.2.3. Risk Mitigation

In order to limit and monitor the Company's exposure to market risk, several mitigating measures are in place.

A conservative policy on asset allocation is applied. Regular reporting on the evolution of the Company's assets, the market development and of the gap of duration between assets and liabilities allow for a close monitoring of the risk exposure.

To limit the spread risk, the investment in a single issuer or debtor is restricted sufficiently. Rules are explicitly defined in the according Group Directive.

C.2.4. Risk Sensitivity

Very similar to the processes for analyzing underwriting risk, FRIDAY applies various sensitivity and scenario analyses to those parameters that influence the market risk.

Based on the analysis of the sensitivities on a standalone basis, i.e. when ignoring any diversification effects between the individual risks, the Company's market risk exposure is driven by interest rate and spread risk. The sensitivities considered do not result in a Solvency II ratio below 100%.

C.3. Counterparty Default Risk

C.3.1. Risk Exposure

Counterparty default risk relating to assets held by insurance companies refers to the total potential downside risk arising from deterioration in the credit quality of a borrower or issuer. Counterparty default risk is managed by monitoring the credit quality of each individual counterparty and relying heavily on credit ratings.

The risk increases when counterparties become concentrated in a single sector or geographic region. Economic trends that affect whole sectors or regions can jeopardize an entire group of otherwise unrelated counterparties.

The counterparty default risk takes into account the following components:

Type 1: Counterparty default risk exposures where diversification is low, and the counterparty is likely to be rated. For the Company the exposure is mainly driven by its reinsurance receivables of the proportional treaties and cash account balance.

Type 2: All remaining counterparty default risk exposures, such as insurance receivables arising from policyholders and intermediaries.

As of year-end 2022, the gross Solvency Capital Requirements for counterparty default risk amount to EUR 1,353.6 thousand, mainly driven by type 1 exposures reinsurance due to the existing quota share agreements.

As of year-end 2021, the capital requirement for counterparty risk was EUR 1,815.2 thousand. Type 2 exposure decreased during the reporting period.

C.3.2. Risk Concentration

No significant risk concentration with regards to counterparty default risk is observed. Although a concentration in bank deposits and in receivables of proportional reinsurer exists when considering the single name exposures, the deposits are distributed across different counterparties.

C.3.3. Risk Mitigation

In order to account for the significance of counterparty default risk stemming from spread and counterparty default risk, the Company tracks counterparty exposure at all times and monitors counterparty default risk from a global point of view.

To restrict the counterparty default or accumulation risk in the Company, the proportion that may be invested in a single issuer or borrower is strictly limited in the Group-wide Risk Management Standards. In addition, reinsurance contracts can only be concluded if they have been approved by Baloise Group Finance. In general, transactions may only be made with reinsurers that have a minimum rating by Standard & Poor's of "A". This rule excludes captives and pools as reinsurers which are usually not rated.

The relevant rules are explicitly defined in the Group investment policy and Group reinsurance policy.

To limit the counterparty default risk exposure stemming from policyholders, an adequate procedure of credit check score of the customer before offering a contract and for the recovery of receivables during the contract lifetime is in place.

C.3.4. Risk Sensitivity

Overall, in terms of the capital position of FRIDAY per year-end 2022, measured according to the standard formula applicable according to Solvency II, the gross Solvency Capital Requirement by type of counterparty risk before diversification effects amounts to EUR 1,040.6 thousand for Type 1 exposure and EUR 385.2 thousand for Type 2 exposure. The sensitivities considered do not result in a Solvency II Ratio below 100%.

C.4. Liquidity Risk

Typically, liquidity risk is referred to as the risk that directly transferable funds, such as cash or bank account amounts, are not available or not available at acceptable cost to an entity when needed to make due payments.

C.4.1. Risk Exposure

The Company is exposed to liquidity risk in the sense that a liquidity strain might not be sufficiently offset by the sale of assets or an alternative refinancing might not be in place sufficiently fast.

The Company's assets are generally invested in liquid instruments such as government bonds taking into consideration their suitability to match these liabilities.

The most important liquidity risk may be caused by a catastrophic event which could trigger exceptionally large claims or a large number of claims to be received in a short period. Risk mitigating measures such as reinsurance cover limit the liquidity risk arising from such events as full claim amounts are not paid immediately after the event allowing for additional time to liquidate assets. In addition, restrictions on investments are in place to further reduce the risk as described in the previous section on counterparty default risk.

It should be noted that catastrophic events are rare and adequate Solvency Capital Requirements for such an event are considered in the Company's underwriting risk exposure.

Due to the nature of the business including mostly short-term contracts, no expected profit is considered in the future premium amounts (EPIFP) as of year-end 2022.

C.4.2. Risk Concentration

The Company is not exposed to significant liquidity risk concentration.

C.4.3. Risk Mitigation

In addition to local regulation requirements, a cash planning is implemented and updated on a monthly basis. There is a buffer of cash to cover any deviation of the expenses in the upcoming period. Adequate investment planning and appropriate asset and liability management ensure that the exposure is monitored and managed on a regular basis. Liquidity constraints are considered in the Company's business plan and a regular discussion point in the ALCO-RICO. Limits for acceptable liquidity risk are defined in the Company's liquidity policy and followed-up on a regular basis via the Company's key risk indicator reporting.

C.4.4. Risk Sensitivity

Because liquidity risk is already captured in its material parts by counterparty default risk and operational risk, no additional sensitivities for liquidity risk are calculated.

C.5. Operational Risk

C.5.1. Risk Exposure

For FRIDAY, operational risk covers the risk of financial losses arising from inadequate or failed internal processes, personnel or systems, or from external events. Operational risk also includes legal and compliance risks. Management and information risks (including strategy risks) as well as business and environment risks are considered as separate categories of risk.

The risks are regularly identified, assessed, controlled and steered via the "Own Risk and Solvency Assessment" process. Internal processes deal with a variety of tasks, including the writing of new insurance contracts, managing existing contracts, preparing documents required by regulatory and tax authorities and preparing financial reporting for FRIDAY. Typically, IT systems support these processes, and such systems may not work or not work properly, causing stalled processes or e.g. wrong data or documents. Human error may as well affect the correct execution of business processes.

The operational risk exposure quantified in the SCR is decreasing compared to previous year driven by a lower amount of technical provision (from EUR 49,188 thousand to EUR 38,717 thousand).

C.5.2. Risk Concentration

FRIDAY has not identified any risk concentration with respect to operational risk during the reporting period. Nonetheless, the current business underwritten is still concentrated on the German market, although the business in France is growing.

C.5.3. Risk Mitigation

FRIDAY mitigates its operational risks by various techniques to make processes and systems as robust as possible. These include information security procedures, business continuity planning, ongoing training for employees, clear process descriptions and responsibilities, back-up solutions and double signatures for all key decisions. These process related measures are accompanied by state-of-the-art IT systems.

In addition, process risks resulting from lack of application of procedures or application of inadequate procedures are mitigated by the Company's effective internal control system. Controls are assessed on a yearly basis. Detected control weaknesses will be mitigated by action plans.

In the reporting period, the efficient Business Continuing Management (BCM) continued to ensure that FRIDAY met the challenging market conditions, especially during the ongoing pandemic situation in the beginning of 2022.

For the business operation of FRIDAY Insurance S.A., the situation translated into a strongly increased fraction of employees working from home. FRIDAY was fully operational on a remote basis from day one. The BCM has defined appropriate measures and reacted quickly to developments. The continuity of business operation was and is successfully ensured without interruption. According to the development of the pandemic the situation normalized during the year.

C.5.4. Risk Sensitivity

The Company bases its quantification of operational risk on the standard formula according to Solvency II. This approach assumes some flat-rate losses on premium volume and size of business portfolio.

As of year-end 2022 the capital requirements for operational risk amount to EUR 1,425.6 thousand as measured by the Solvency II standard formula which represents the impact for the Company if all of the negative impacts described would happen at the same time. The considered sensitivity does not result in a Solvency II Ratio below 100%.

C.6. Other relevant information (including other material risks)

Major other material risks include business and environment risks, management and information risks as well as emerging risks.

Business environment risks and management and information risks arise directly or indirectly through the business environment or the strategic activities of a company.

Emerging risks are new or foreseeable risks, which cannot or cannot easily be quantified (for example due to the lack of historical data), but which might have a major financial impact. Identified emerging risks include for example cyber risks, a global pandemic / epidemic, long-term low yield interest rate environment, and environmental risk.

In general, sustainability is considered along the dimensions environmental, social and governance (ESG). Risks related to sustainability are integrated into existing risk management processes and frameworks. Whereas the strategic aspect of sustainability forms a separate risk type within the risk category "Leadership and Information Risks", operative sustainability risks are integrated within the traditional risk categories of the risk map such as market, underwriting or reputational risks. Integrating risks with a sustainability aspect into existing risk processes assures that they are assessed regularly from different perspectives and that measures are in place to manage and mitigate them successfully.

D. Valuation for Solvency Purposes

D.1. Assets

D.1.1. Basis, methods and assumptions for the valuation of each material class of assets

Solvency II incorporates the measurement approach for assets according to International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS). FRIDAY applies these principles already for its contribution to the group financial statements of its ultimate holding company, Baloise Holding AG.

Assets under Local GAAP and Solvency II Valuation

	2022.12		
Assets	Local GAAP	Solvency II	Difference
EUR '000			
Intangible assets	62,1	-	-62,1
Property, plant & equipment held for own use	525,4	525,4	0,0
Property (other than for own use)	-	-	
Equities	-	-	
Government Bonds	24.414,3	20.790,9	-3.623,4
Corporate Bonds	15.221,9	13.784,4	-1.437,5
Assets held for index-linked and unit-linked contracts	-	-	
Loans & mortgages	242,2	242,2	0,0
Reinsurance recoverables	26.410,0	26.588,1	178,1
Insurance & intermediaries receivables	171,9	171,9	0,0
Cash and cash equivalents	2.384,7	2.384,7	0,0
Other	16.380,6	14.079,9	-2.300,6
Total assets	85.813,2	78.567,7	-7.245,5

Intangible assets

The statutory value of intangible assets consists of the acquisition values deducted by the accumulated regular amortizations. The amortization rate is set at 20% except for the concessions, patents, licenses, and trademarks where the amortization rate is between 20% and 25%. The position is composed of formation expenses, licenses and trademarks.

In the Solvency II balance sheet, the intangible assets are presented with a value of EUR 0.

Property, plant and equipment held for own use

The statutory value reflected under this caption consists of acquisition value minus depreciation. The depreciation rate of plant, machinery and furniture amounts to 10% and the depreciation rate of IT equipment amounts to 33%.

Property (other than for own use)

No investment in property can be found in the balance sheet.

Participations

In the Solvency II balance sheet, the participation is valued using the equity method, using a Solvency II consistent recognition and measurement for the holding's balance sheet, amounting to EUR 190.5 thousand. The Company is holding 100% participation in FRIDAY Technology Sp. z o.o. in Warsaw, Poland.

Participations

	% of holding	Own funds	Result of the year	Seat	Solvency II value of participations
in EUR '000					
FRIDAY Technology Sp. z o.o.	100.00%	131.6	-48.2	Warsaw (Poland)	190.5

Financial assets

The statutory value of bonds consists of acquisition value and depreciations based on the "amortized cost" method. The bond's market values are obtained from an external source. The whole bond portfolio is exclusively composed of EUR denominated bonds.

Additionally, it can be stated that no derivatives can be found in the portfolio.

Reinsurance recoverable and receivables

In the Solvency II balance sheet insurance receivables, reinsurance receivables as well as other receivables are recorded at the lower of their nominal and their probable realizable value. Value adjustments shall be made when recoverability is questionable, either in part or entirely. These value adjustments shall no longer be considered when the reasons for which they were made cease to apply.

The reinsurance recoverable under SII is valued using the Best Estimate method so as for the corresponding liabilities. It is determined as the difference between the gross and net cash flows coming from the reinsurance contracts.

Deferred tax assets

No deferred tax asset can be found on the balance sheet.

Any other assets

The other assets, amounting to EUR 15,347.7 thousand under Local GAAP, concern deferred charges, trade receivables and other accrued income amounts. The main position relates to media services deferred charges: the difference between the statutory and the Solvency II values is linked to accrued consumption which is shown as payables in the statutory accounts. The accrued interests are presented under this caption under Local GAAP only and are not subject to revaluation.

The other accruals on the assets side generally concern charges which have been paid in advance. The positions are determined for local closing and are not subject to revaluation.

D.1.2. Reconciliation to Financial Reporting

The differences between the statutory balance sheet and the Solvency II values as well as their financial impacts are already explained in the previous section.

D.2. Technical Provisions

Technical Provisions are the Company's allocation of capital to meet the obligations directly related to the insurance business. Following Solvency II principles, they are composed of the Best Estimate and the Risk Margin.

Best Estimate

The Best Estimate is the average of the outcomes stemming from insurance obligations of all possible scenarios, weighted according to their respective probabilities. It can be decomposed in premium provisions and claims provisions. The Best Estimate for premium provisions represents the expected present value of future in- and out-going cash-flows originated from future claims, while the Best Estimate for claims provisions represents the expected present value of future in- and out-going cash-flows originated from outstanding claims.

Risk Margin

A Risk Margin increases the overall value of the Technical Provisions from the discounted Best Estimate to an amount equivalent to a theoretical level needed to transfer the obligations to another insurance company.

D.2.1. Technical Provisions Valuation

Technical Provisions by line of business: overview

Technical Provisions are the largest item on an insurance company's balance sheet, meaning a company's financial strength is sensitive to movements in their value.

The tables below provide an overview of the composition of the technical provisions per line of business, separately for the lines business of the segment non-life:

Non-Life Technical Provisions

Technical Provisions by Line of Business

	2022.12					
in EUR '000	Premium provisions	Claims provision	Risk Margin	Recoverables from reinsurance	Total Solvency II	Local GAAP
Medical expense insurance	-	-	-	-	-	-
Income protection insurance	-103,1	2,3	19	-86,8	-98,9	23,7

Non-proportional marine, aviation and transport reinsurance	-	-	-	-	-	-
Non-proportional property reinsurance	-	-	-	-	-	-
Total	13.090,2	25.179,9	447,4	26.588,1	38.717,5	37.204,4

Valuation of the Best Estimate and Risk Margin: methods and key assumptions

Best Estimate

The Best Estimate is calculated using a deterministic approach. It is calculated gross using a cash flow basis with a separate explicit calculation for reinsurance, also using a cash flow basis. Further to the minimum segmentation noted above, the Best Estimate is also split between claims and premium provisions for non-life business.

The cash flows include future cash inflows. Premium provisions are therefore net of future premium receipts which can make them negative.

The Best Estimates must not include margins for optimism or conservatism. Reserves held in excess of the Best Estimate must be excluded from the Best estimate calculation but may still be included for financial reporting purposes.

Cash flows must be discounted for the time value of money. The yield curves for major currencies to apply by currency are supplied by the supervisor and are fixed for each valuation date.

Reinsurance

The Technical Provisions are calculated gross, with reinsurance calculated separately under the same principles. Reinsurance recoveries will continue to allow for expected non-payment whether caused by default or dispute.

Expenses

Managing agents take into account all expenses that would be incurred in running-off the existing business, including a share of the relevant overhead expenses e.g. professional fees. This share should be assessed on the basis that the syndicate continues writing new business. Expense provisions under Solvency II include items such as administrative expenses, investment manager's costs, claims expenses, acquisition expenses and overhead expenses.

Risk Margin

A Risk Margin increases the overall value of the Technical Provisions from the discounted Best Estimate to an amount equivalent to a theoretical level needed to transfer the obligations to another insurance company.

Where the Best Estimate and Risk Margins are calculated separately, which is the case for the vast majority of non-life business, Risk Margins are calculated using a cost of capital approach.

The cost of capital approach requires the Risk Margin to be calculated by determining the cost of providing an amount of eligible Own Funds equal to the Solvency Capital Requirement (SCR) necessary to support the current obligations over their lifetime.

Assumptions

Assumptions used within the calculation of Solvency II Technical Provisions are consistent both with financial market information and "generally available" insurance risk data.

No transitional measures are used.

Uncertainty

The Best Estimate corresponds to the probability-weighted average of future cash flows and will therefore allow for uncertainty in these future cash flows. In this context, allowance for uncertainty refers to the consideration of the variability of the cash flows necessary to ensure that the Best Estimate represents the mean of the full distribution of those cash flows.

Gross and reinsurance cash flows adequately recognize the uncertainty inherent within them, though not using implicit or explicit prudence.

The Best Estimate and the application of the valuation technique, where relevant, may include the following:

- Fluctuations in the timing, frequency, and severity of claim events.

- Fluctuations in the period needed to settle claims.
- Fluctuations in the amount of expenses.
- Changes in the value of an index/market value used to determine claim amounts.
- Changes in both entity and portfolio specific factors such as legal, social, or economic factors, where relevant.
- Uncertainty in policyholder behaviour.
- The exercise of discretionary future management actions.
- Path dependency, where the cash flows depend not only on circumstances such as economic conditions on the cash flow date, but also on those circumstances at previous dates.
- Interdependency between two or more causes of uncertainty.
- For the standards claims, uncertainty mostly comes from the evaluation methodology. This is considered in the reserve risk. Another uncertainty can come from the choice of the methodology. Different methodologies are compared and the more adequate one based on expert judgement is used.

For non-life reserves the amount of Technical Provisions is sensitive to changes in claims development.

Allowance for uncertainty does not suggest that additional margins should be included within the Best Estimate.

Changes since last reporting period

There were no material changes in the relevant assumptions made in the calculation of technical provisions during the reporting period.

D.2.2. Reconciliation to Financial Reporting

Statutory lines of business are classified in line with Solvency II lines of business.

Below the difference between the Technical Provisions of the statutory balance sheet is compared to the Solvency II evaluation. The presented results are net of reinsurance. Statutory figures are the sum of the claims provision (provision for unallocated expenses included) and the unearned premiums provisions. Solvency II figures are the technical provisions described above.

Technical Provisions by Line of Business

	2022.12	
	Local GAAP	Solvency II
in EUR '000		
Medical expense insurance	-	-
Income protection insurance	23.7	-98.9
Workers' compensation insurance	-	-
Motor vehicle liability insurance	24,128.9	24,928.2
Other motor insurance	9,133.7	12,180.9
Marine, aviation and transport insurance	0	-
Fire and other damage to property insurance	2,826.8	1,373.1
General liability insurance	1,040.8	467.1
Credit and suretyship insurance	-	-
Legal expenses insurance	1.9	2.2
Assistance	48.6	-135.1
Miscellaneous financial loss	0.1	-0.1
Non-proportional health reinsurance	-	-
Non-proportional casualty reinsurance	-	-
Non-proportional marine, aviation and transport reinsurance	-	-
Non-proportional property reinsurance	-	-
Total	37,204.4	38,717.5

The Solvency II calculations are based on statistics of historic data according to line of business. Resulting cash flows are then discounted using the risk-free curve provided by the supervisor.

The statutory evaluation is done on a case by case basis.

Regarding the claims reserves, the statutory approach is more prudent than Best Estimate calculations and does not take into account discounting. Moreover, the evaluation of the premium provisions in Solvency II is not similar to the principle of the unearned premiums. A loss results when moving from the local accounting standard to the valuation according to the Solvency II regulation, as the total premium provisions are below the unearned premiums. The Risk Margin calculated under Solvency II is not part of the statutory figures and increases Solvency II provision compared to Local GAAP.

D.3. Other Liabilities

D.3.1. Basis, methods and assumptions used for valuing other liabilities

The statutory and Solvency II balances concerning other liabilities are composed of the following positions:

Other liabilities

	2022.12		
	Local GAAP	Solvency II	Delta
in EUR '000			
Provisions other than technical provisions	954.1	954.1	0
Pension benefit obligations	0	0	0
Deposits from reinsurers	0	0	0
Deferred tax liabilities	0	0	0
Insurance & intermediaries payables	377.6	377.6	0
Reinsurance payables	3,273.8	3,273.8	0
Payables (trade, not insurance)	6,550.2	4,542.4	-2,007.7
Any other liabilities, not elsewhere shown	0	0	0
Other liabilities	11,155.7	9,148.0	-2,007.7

They are composed of all quantified risks, which are already known, and charges known but not yet invoiced. The measurement of provisions requires assumptions to be made about the probability, timing, and amount of any outflows of resources embodying economic benefits. A provision is recognized if such an outflow of resources is probable and can be reliably estimated. The other provisions under Lux GAAP include Media for Equity Services deferred charges: the difference between the statutory accounts and the Solvency II value is linked to some accrued consumption which is considered as a net position in the other assets in Solvency II.

The creditors arising out of insurance and reinsurance operations as well as the other creditors are not subject to revaluation, as they have no duration. However, we have one difference linked to the presentation of the subrogation and salvages, netted in the technical reserves under Solvency II.

D.3.2. Reconciliation to Financial Reporting

The differences in methodology as well as the quantitative impacts between the statutory balance sheet and the Solvency II values are already explained in the previous section.

D.4. Other relevant information

No further relevant information is reported.

E. Capital Management

E.1. Own Funds

E.1.1. Capital management: objectives, policy and processes

Capital is a scarce and strategic resource, which requires a clearly defined, rigorous and disciplined management approach in order to ensure efficient and effective deployment. This approach must balance the needs and requirements of stakeholders including shareholders, regulators, employees and customers.

Objectives

FRIDAY's main objectives in capital management are the following:

- to fulfill the solvency requirements defined by the regulatory frameworks.
- to ensure business continuity and the capacity to develop its activity.
- to pursue the optimal ratio between equity and debt, by ensuring adequate remuneration of all capital and debt sources.
- to determine impact on pricing policies which are consistent with risk levels of each activity sector and
- to create value to shareholders.

The Company has to comply with local laws and regulations and/or local supervisory authorities' requirements regarding a minimum capital. This minimum capital should be maintained as per local legislative framework in order to fulfill its insurance obligations. This minimum level of capital has been continuously maintained during the reporting period.

Moreover, according to internal risk management guidelines, the solvency needs are quantified based on the Solvency II standard formula and additionally by the "Swiss Solvency Test", which is a modern, risk-based and market-consistent solvency regime in Switzerland.

Policy

The Company has a Capital Management policy in place that sets forth the principles and guidelines applied within the own funds management context. It sets forth the overall definition of capital and capital adequacy ratios. The guidelines aim for an effective and optimised capital management. Moreover, the policy highlights the different activities within the capital management framework: capital planning, capital contingency and capital allocation.

In addition, the document displays the governance structure that supports capital management. This policy covers the roles and responsibilities and reporting requirements needed to support the previously mentioned objectives.

Processes

The main goal of the capital management process is to optimize the capital structure, composition and allocation of capital within the Company, fund profitable growth and protect the viability and profitability of the insurer. The process also ensures continued eligibility of own fund items through close monitoring of the eligibility criteria.

Capital management planning takes into account the following:

- The required capital linked to expected level of risk and risk appetite, as well as risk assessments.
- Own funds projected over a time horizon of at least three years.
- The capital level the Company wants to hold, considering:
 - Legal requirements, and anticipated changes;
 - Growth ambitions, and future capital commitments;
 - Security buffers to ensure that obligations are met.
- Dividend policy and future capital raising.

Capital allocation is performed based on the following principles:

- Capital (re)allocation based on funding business plans which meet strategic and performance objectives.

Allocation takes into account optimizing expected risk, value creation and capital use. Own Funds Analysis

Own Funds overview

Under Solvency II, own funds represent those funds of the entity that are available to compensate the financial impact of adverse scenarios for the insurer. An insurer needs to hold certain amounts of own funds covering specific capital requirements (SCR and MCR).

Own funds are categorized into three different “Tiers”: Tier 1 is the highest class, typically characterized by unconditional availability of the funds in case of losses by the insurer. Funds in Tier 2 and Tier 3 respectively generally have limitations as to the amount of funds available, the conditions for availability or the period during which they are available. Accordingly, an insurer may only use Tier 1 Own Funds to cover capital requirements without restrictions, subject to certain limitations for specific instruments. The Own Funds of FRIDAY entirely consist of unrestricted Tier 1 funds per year-end 2021.

Own Funds structure and composition

Solvency II guidance further distinguishes own funds by the way they are funded: Generally speaking, “Basic Own Funds” are fully paid in, whilst “Ancillary Own Funds” are only available by an insurer on demand. All own funds of the Company are Basic Own Funds.

As of year-end 2022, no Ancillary Own Funds are present and in this way a breakdown is obsolete. The eligible Basic Own Funds exclusively belong to the Tier 1 category.

Analysis of change for all tiers

As the eligible Basic Own Funds of the Company only consist of Tier 1 capital, no further remarks are made in addition to the explanations provided previously.

Deductions and restrictions

It should be noted that the previously described media-for-equity transaction which is not yet consumed is not considered in the Basic Own Funds under Solvency II as they are not considered to fulfill the criteria to be considered as own funds under Solvency II.

No further deductions and restrictions in addition to the previously described consideration of eligibility criteria is observed. No ring-fenced funds are present.

Basic Own Funds (BOF)

The Basic Own Funds are exclusively composed of reconciliation reserve and ordinary share capital.

Ordinary share capital

The ordinary share capital of the Company amounts to EUR 15,014.6 thousand divided into 15,014,614 shares with a designated nominal value of EUR 1 per share.

In December 2020 shareholders have also resolved on conditional capital of up to 3,05 million shares with a designated value of EUR 1 that may be issued in connection with an employee stock option plan.

Subordinated liabilities

Per year-end 2022 the Company has not issued subordinated liabilities.

Reconciliation reserve

The table below reconciles this amount with the own funds reporting for the figures year-end 2022.

S.23.01.01. Own funds: reconciliation reserve

		C0060
EUR '000		
Reconciliation reserve		
Excess of assets over liabilities	R0700	30,702.2
Own shares (held directly and indirectly)	R0710	-
Foreseeable dividends, distributions and charges	R0720	-
Other basic own fund items	R0730	15,014.6
Adjustment for restricted own fund items in respect of matching adjustment portfolios and ring	R0740	-
Reconciliation reserve	R0760	15,687.6
Expected profits		
Expected profits included in future premiums (EPIFP) - Life business	R0770	-
Expected profits included in future premiums (EPIFP) - Non-life business	R0780	-
Total Expected profits included in future premiums (EPIFP)	R0790	-

Ancillary Own Funds (AOF)

Structure Ancillary Own Funds

No Ancillary Own Funds are present.

Methods of valuation AOF

Not relevant.

E.1.2. Transitional arrangements

No Own Fund items are subject to transitional arrangements. Eligible amount of Own Funds to cover the SCR and MCR

Eligible Own Funds

The capital structure of the Company is explained in the chapter Own Funds Analysis. The table and graph below confirm that the Company meets its Solvency Capital requirements.

Own Funds: Eligible Own Funds and capital requirements

		2021	2022				
		Total	Total	Tier 1 - unrestricted	Tier 1 - restricted	Tier 2	Tier 3
in EUR '000							
Available and eligible Own Funds							
Total available Own Funds to meet the SCR	R0500	33,482.3	26,197.1	26,197.1	-	-	-
Total available Own Funds to meet the MCR	R0510	33,482.3	26,197.1	26,197.1	-	-	-
Total eligible Own Funds to meet the SCR	R0540	33,482.3	26,197.1	26,197.1	-	-	-
Total eligible Own Funds to meet the MCR	R0550	33,482.3	26,197.1	26,197.1	-	-	-
SCR	R0580	7,645.8	6,876.6				
MCR	R0600	3,700.0	4,000.0				
Ratio of Eligible Own Funds to SCR	R0620	438%	381%				
Ratio of Eligible Own Funds to MCR	R0640	905%	655%				

The available own funds decreased by EUR 7,285.2 thousand during the reporting period mainly driven by unrealized losses and by the result of the year. The Company's Solvency II ratio decreased from 438% to 381% during the reporting period.

Reconciliation with Financial Statement equity

The delta between the local Own Funds and the Solvency II available capital amount EUR -6.674,1 thousand divided up as follows:

	2022.12		
	Local GAAP	Solvency II	Delta
in EUR '000			
Subscribed capital	15.014,6	15.014,6	0,0
Revaluation reserves	0,0	0,0	0,0
Reserves	169.301,2	169.301,2	0,0
Reconciliation to local results	0,0	-6.674,1	-6.674,1
Adjustment reinsurance	0,0	178,1	178,1
Adjustment other assets	0,0	-7.406,0	-7.406,0
Adjustment technical provisions	0,0	-1.516,6	-1.516,6
Adjustment other liabilities	0,0	2.070,4	2.070,4
Benefit brought forward	-114.955,8	-114.955,8	0,0
Result of the year	-31.983,7	-31.983,7	0,0
Own Funds*	37.376,3	30.702,2	-6.674,1

* Before deduction of Own funds from the financial statements that should not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds

The previously described media-for-equity transaction which is not yet consumed is not considered in the basic own funds under Solvency II as they are not considered to fulfill the criteria to be considered as own funds under Solvency II.

Notable differences in figures resulting from differences in measurement under the Solvency II regime and local accounts are explained in the following:

- The adjustment of other assets concerns bonds which are valued at a market value different from the local representation and the correction of the deferred charges;
- The technical provisions adjustment is linked to the transfer from gross local reserves to gross Best Estimate;
- The adjustment of other liabilities is linked to the correction of the deferred charges.

E.1.3. Deferred Tax Assets

No Deferred Tax Asset has been recognized in the Company's own funds, thus this section is not applicable.

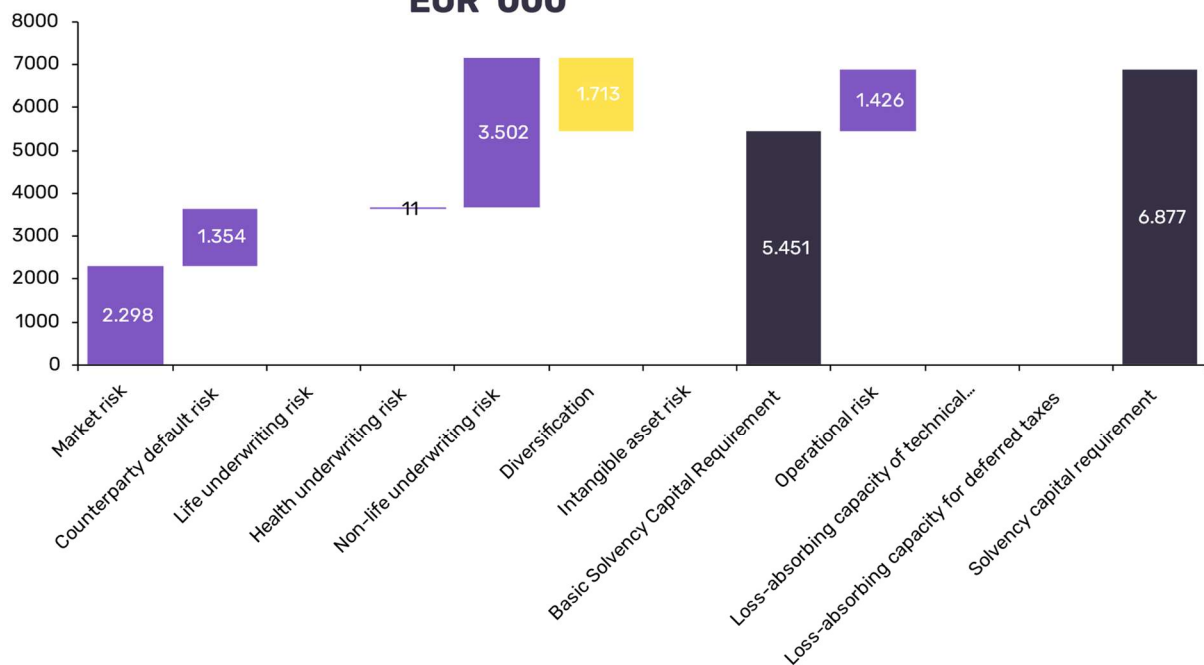

E.2. SCR and MCR

E.2.1. SCR and MCR: overview and key changes

Solvency position

As of year-end 2022 the Solvency capital requirement of the Company amounts to EUR 6,876.6 thousand. This amount is split over the different risk modules of the Solvency II standard formula as illustrated in the waterfall diagram.

Gross Solvency Capital Requirement - Composition in EUR '000

During the reporting period the Company's Solvency Capital Requirements evolved as illustrated in the table below.

Gross Solvency Capital Requirement for companies on Standard Formula

	2021	2022
in EUR' 000		
Market risk	2,291.8	2,297.8
Counterparty default risk	1,815.2	1,353.7
Life underwriting risk	-	-
Health underwriting risk	82.8	11.2
Non-life underwriting risk	3,616.4	3,501.7
Diversification	-1,924.7	-1,713.4
Intangible asset risk	-	-
Basic Solvency Capital Requirement	5,881.4	5,451.0
Calculation of Solvency Capital Requirement		
Operational risk	1,764.4	1,425.6
Loss-absorbing capacity of technical provisions	-	-
Loss-absorbing capacity of deferred taxes	-	-
Capital requirement for business operated in accordance with Art. 4 of Directive 2003/41/EC	-	-
Solvency Capital Requirement excluding capital add-on	7,645.8	6,876.6
Capital add-on already set	-	-
Solvency Capital Requirement	7,645.8	6,876.6
Minimum Capital Requirement	3,700.0	4,000.0

The risk module contributing the most to the Basic Solvency Capital Requirement before diversification is the non-life underwriting risk followed by the market risk.

Material changes in SCR and MCR

The SCR decreased by 10% during the reporting period mainly due to a decrease in counterparty risk.

Information on the inputs used by the Company to calculate the MCR

The Minimum Capital Requirement (MCR) as of year-end 2022 is EUR 4,000.0 thousand.

The information used to calculate the MCR based on the standard formula are the following:

- Technical Provisions without a Risk Margin by line of business after deduction of the amounts recoverable from reinsurance contracts with a floor equal to zero;
- Premiums written for insurance obligations by line of business during the last 12 months, after deduction of premiums for reinsurance contracts, with a floor equal to zero.

Calculations performed as described above based on the Company data led to a lower MCR value than the absolute floor value for MCR defined by EIOPA, so the absolute floor value was set as MCR for the Company.

The absolute floor has been reevaluated by EIOPA in October 2022 from EUR 3,700 thousand to EUR 4,000 thousand which corresponds to the value of the MCR of the Company.

E.2.2. Simplified calculations and entity specific parameters

No simplified calculations or specific parameters have been used by the Company for the MCR and SCR calculations.

E.2.3. Use of the duration-based equity risk sub-module for SCR calculation

Use and Supervisor approval (Art. 304)

The duration-based equity risk approach is subject to prior supervisory approval. The current application of the approach does not pre-empt any future decision by national supervisory authorities to approve or not to approve such approach.

The Company does not apply the duration-based equity risk sub-module for the calculation of its Solvency Capital Requirements.

E.3. Difference between the standard formula and any internal model used

FRIDAY Insurance S.A. makes full use of the standard formula. This section is therefore currently not applicable.

E.4. Non-compliance with the MCR and the SCR

E.4.1. Amount of non-compliance

FRIDAY has been compliant with the Solvency II Minimum Capital Requirements and the Solvency Capital requirements during the entire reporting period.

E.4.2. Explanations of causes, effects and remedial actions

Not relevant.

E.5. Other relevant information

No supplementary information in addition to the information previously disclosed is considered material.
